Also, the interior flags and system are great and without them, the new dog would be out of the house!!!! Great folks! read more Nancy Miller 1919 04 Oct 18 We have had a great experience with Dog Watch. We had a large amount of acreage done and it has been awesome. Our boys have plenty of room to run safely. The customer service has been awesome as well. We have had lightning strikes twice and they replaced the box both times quickly. I would recommend them to anyone and if we move, we will get another Hidden Fence.<http://www.judemusic.nl/fckdata/casio-europe-support-manuals.xml>

Never had any issues or concerns. I would use them again if we get a new dog Lt. Crossbones 2151 25 Aug 18 I have had a Dogwatch fence for my two boxers at three different houses. This company ROCKS! They take the time to get to know you on a personal level in order to accommodate you and your fur babies. The containment and safety of my dogs is an added bonus. I will never go with anyone but Dogwatch Hidden Fence. Weston is extremely knowledgeable, professional and what a hard worker. Everyone at the company is kind, courteous and very, very helpful. Definitely recommend. On the lowest setting, she has learned in a week what is acceptable barking. The Collar works great it allows her to bark some but definitely put a stop to the nonstop barking that was driving the family crazy. Thank you DogWatch for an amazing product. But it's the people that make this company worthwhile. Friendly, attentive and are eager to help with any issue that may arise. We were very happy. J A 0058 15 Nov 18 The install was finished in no time at all. The installer, Weston Martin was very helpful and knowledgeable. We have had the fence up for a full week now and everything is going great. Stephanie the Trainer was also very helpful and took her time, worked with me and Jasper our dachshund. We've accidentally broken the buried wire and have had excellent response to get it repaired. The training they gave the dogs and us worked well. We are super happy

with the fence and the company. Were about to use them again. We moved 3 times. Gentle solution for our two lovely dogs. Id give it 6 stars if I could. I was so pleased at how well the training went and how effective this fence was. It has changed their life!! They no longer have to be in their standard fence staring out. They run and play in the entire yard and I feel safer at night knowing they can patrol my yard freely. <http://aethercircus.com/casio-ev-570p-manual.xml>

Best money I ever spent read more Kim Johnson 0349 14 Dec 18 We were pleasantly surprised after moving from the North Georgia Mountains where our two Standard Poodles had acres to roam on. We moved to Canton to a new home with a small lot. The training was as promised and within 4 days the two dogs were trained and contained. Great Job and Highly recommend. They were very helpful with any issues and provided great information too. For years, we could count on them and they were generous with their time and resources. First Class all the way. We used them 2 years ago and haven't ever had an issue with our electric fence. Highly recommend! read more Jennifer Benton 0351 02 Jan 19 The previous owners of the house we bought this summer recommended Dogwatch to us. As the line was already installed in the property, all we needed to buy was the equipment. The man who came was very friendly, personable, and knowledgeable. He answered all of my questions and made certain I was satisfied with his work before he left. We have THOROUGHLY enjoyed our fencesuch an improvement from the wireless one we previously used. DogWatch installed a new base unit and then found and repaired three terrible splices that the other provider made in the line. So far a great experience and my periodic troubles have not reappeared. It was a great experience and would highly recommend their service. Price was reasonable, and seems to give you more for your money than other companies our install is monday. cant wait I know our puppy is going to love having some freedom in the yard. Great customer service, attention to the customer's needs. They love Dogs and their people. We are so happy with our new fence, and our neighbors are too. Highly recommend! read more Taylor Forbus 0300 25 Jan 19 Couldn't be more happy with Stefanie and her personalized service and helping me train my stubborn dogs within just one day. We all feel safer and have more fun now that we finally installed dog watch.

My only regret is that we didn't do it earlier. Also everyone we interacted with was amazing, informative, and friendly. They quickly respond to anything that needs attention, like a broken line. I've used other underground containment services but I highly recommend DogWatch of Atlanta. From the first call to the completed installation, it was a very good experience. Highly recommend DogWatch. But that inconvenience is a result of doing business with a small, family-owned operation. And the payoff is well worth it. Sandy Gulotta 2130 13 Mar 19 Money well spent. From start to finish we were pleased with the product quality, convenience, and professionalism of DogWatch. Would recommend again and again. Very professional. They did not damage my lawn, they cared about my property. Great customer service. They stand behind their product. Quick response to breaks in the line. Their costs to repair damage to the lines after placement is very reasonable. Their afterpurchase care is exceptional. I highly recommend them. I would definitely use their services again. They explained everything thoroughly and offered great options. Our fence is working wonderfully, and thanks to the excellent training information, both of our dogs are safe and sound. I highly recommend them. I wish we had installed one when we first bought our home. It is the best investment any home and dog owner can make. The owners and staff are wonderful to work with. Thank you Dog Watch for keeping our fur babies safe. We never fear our Brittany Spaniel running out of the yard. She respects the boundaries of the Dog Watch fence even when other dogs pass by. In fact, after 10 years, she rarely even wears her collar and still stays within bounds. DogWatch has excellent customer service and we highly recommend their system. I sent an online inquiry to DogWatch requesting information.

Stefanie, the Sales Consultant from DogWatch, called me within a couple hours the same day I

submitted my inquiry and came out to my house that afternoon. Stefanie was very friendly and knowledgeable. She met our two dogs, showed me how the system works, answered my questions, and wrote up a no pressure quote. I scheduled our installation and it was about one week out. Chris, the Installation Technician, was very professional. He came on the installation date at about 8 AM. He was friendly, smiling, and reviewed the work order with me to ensure he understood exactly where I wanted the boundary to be installed. Chris went right to work. The installation of the unit in our garage, the cutting and sealing of the concrete, the trenching of the line, and the white flags marking the boundary was all done seamlessly, efficiently, and professionally. Chris did everything I asked, including negotiating a hill and some trees and brush in the back with his trencher to ensure my dogs got the optimal amount of yard to run in. Stefanie came out that afternoon to train me and the dogs on how to use the collar and system to get the best results. I thought it would be difficult and take a long time. However, within one week and a few "corrections" both dogs understood their boundary. Our two dogs love their new found freedom. We no longer worry about the door not being fully closed, them running out, or them chasing walkers on the street, etc. Our dogs are able to play with our children in the yard, chase tennis balls, and enjoy their yard. I highly recommend DogWatch and Stefanie and Chris in the Atlanta metro area. If you're thinking about doing it, don't hesitate. Now that we have DogWatch, we wish we would have done this years ago. The system has allowed our dog to have so much freedom on our property without the worry of her running into the street or onto our neighbors property.

We have had several breaks in the line over the years due to fallen trees and heavy landscaping equipment and the company has been very quick to respond and fix the breaks. Replacement batteries arrive in mail and everyone we have dealt with has been very professional and knowledgeable. Highly recommend DogWatch. I was so pleased at how well the training went and how effective this fence was. Best money I ever spent read more Kim Johnson 1708 11 May 19 Product works perfectly, Less expensive option than a traditional fence. They took the time to make sure that we understood everything and were extremely fast at getting it installed. Very Happy Customer Here. The fence did the trick and our dogs have the run of over an acre of our property. We only put the collars on them when they start pushing the limits if the yard. It has worked great. Very pleased customer. We have 6 dogs and live in a neighborhood where only horse fencing is allowed, which won't keep a dog in. Not one of my dogs has ever escaped. We've had the system hit by lightning and DogWatch replaced the transmitter for free. I've also had to replace a number of receivers over the years and they've always been easy to work with. I've referred several neighbors to them as well, and they've all loved the system and the service. Don't know what I'd have done without them. Excellent job both times. They even came a day early for the repair to make sure our doggies stayed safe. Highly recommend. read more Michele MacMaster 0039 04 Jun 19 We have had DogWatch Hidden Fence for 6 years. I wish we had installed one when we first bought our home. Thank you Dog Watch for keeping our fur babies safe. Had it for 2 years now. After initial training, we've never had a problem with either of our dogs trying to cross the boundaries. Great customer service Adrienne Brimer 2154 26 Nov 19 Absolutely no problems with the system which was installed in June 2002.

I just wanted to take a quick second to tell y'all how wonderful Jeremy the installer, Lisa the dog trainer, and Stefanie were that came out. Incredibly professional and knowledgeable regarding the product and any questions we had. The entire team has definitely made us a lifetime customer and we will enthusiastically recommend your product to all of our friends and family. Thank you again for offering such a great product with a team that knows that customer care is number one, it is hard to find lately. Since 1991 we've helped thousands of north Georgians keep their pets safe at home. Recognized by DogWatch as one of the top dealers in the world for customer satisfaction and sales, our commitment is to deliver the highest quality and value to our customers in everything we
