

I'm not robot

****Request:**** Convert PDF files to scanned (image) format without OCR recognition. ****Requirements:**** 1. Conversion quality should be controllable or relatively high. 2. The tool should support batch conversion. ****Recommendations:**** * Abbyy FineReader 15: A popular software for converting PDF files to editable formats, including Excel and Word. * LookScanned.io: A tool that can convert PDF files to scanned (image) format without OCR recognition. * Other users recommend using cloud-based services like Google Cloud Vision API or Amazon Textract. ****Tips:**** * Before converting, it's essential to pre-process the PDF file by removing unnecessary elements and improving the scan quality. * Excel files have strict formatting requirements, so it's crucial to be careful when converting scanned PDFs to Excel format. Overall, the thread discusses various software and services that can help with converting PDF files to editable formats, with a focus on preserving the original layout and avoiding OCR recognition. Before posting, please use the forum's search function to see if your question has already been answered or if someone has posted similar content. A user suggests that instead of converting PDFs to images for OCR, you can simply print them to PDF using virtual printers like Adobe PDF, PdfFactory, or TinyPDF. Another user asks why their post was not accepted and mentions that they have tried various methods without success. The main topic of discussion appears to be modifying a BAT file to fix an issue with ABBYY FineReader on Windows 7. The code provided is intended to modify the registry settings to prevent infinite pop-ups when opening the software. The modifications include: * Disabling updates and user statistics collection * Changing the interface language to 64-bit * Registering DLL files * Adding supported image formats The code also includes checks for processor architecture (32-bit or 64-bit) to ensure compatibility. Overall, the discussion seems to be focused on troubleshooting and modifying software settings to resolve issues with ABBYY FineReader on Windows 7. install printer ```` reg add "HKLM\SOFTWARE\Wow6432Node\Tracker Software\PDF-XChange 5 ABBYY FineReader15" /f /v LangsPath /d "%~dp0Languages\" >NUL 2>NUL rundll32 printui.dll,PrintUIEntry /if /b "PDF-XChange 5.0 for FineReader 15" /f "%~dp0Drivers\PrnInst.inf" rundll32 printui.dll,PrintUIEntry /if /b "PDF-XChange 5.0 for FineReader 15" /f "%~dp0Drivers\PrnInst.inf" /r "winpool,Ne02;" /m "PDF-XChange 5.0 for FineReader 15" /z echo green installation completed ! create desktop shortcut ? echo echo is press any key , close directly ! &pause >NUL 2>NUL mshta VBScript:Execute("Set a=CreateObject(\"\"WScript.Shell\"");Set b=a.CreateShortcut(a.SpecialFolders(\"\"Desktop\"") & \"\"ABBY FineReader 15.lnk\"");b.TargetPath=\"%~dp0FineReader.exe\"";b.WorkingDirectory=\"%~dp0\"";b.Save:close") cls &echo echo completed ! &pause >NUL 2>NUL & exit ```` install fine reader shortcut ```` create desktop shortcut ? press any key , close directly ! &pause >NUL 2>NUL finish ! ```` Finereader 15 download free.
