Welcome to the Rare Ranking!The Rare Rarity is the 2nd worst rarity in the game and the Rare Dragons are useful only in the first few minutes after you start playing. The Rare Rarity have Dragons Category 2, 3, 4, 5, 6 and 8. The Category 2 dragons have the lowest stats, the Category 3 dragons have the 2nd lowest stats, the Category 4 dragons have the 2nd highest stats, the Category 5 dragons have the highest stats, the Category 6 dragons have the 3rd highest stats, and the Category 8 dragons have the 3rd lowest stats.This is how strong are the rarities statistically:All the dragons are going to be ranked form A tier to F tier. The tiers tell you how good the dragons are depending for its elements, for the attacks to see how strong are and (just in case) for its abilities in battles.These are the best dragons of the list. These dragons are the best options to start the game, when you get better dragons, these are not going to be useful anymore.These dragons can be a decent choice to use for battles. They can do a good job even if they miss something important.These dragons are decently good in battles is just that they have statistics that makes them a bit weak, in short, they are meh. Hope these dragons don't make you problems.From now on these dragons are having worse statistics and having more problems in battles.These dragons are extremely regrettable, luckily these dragons are saved form the lowest tier just because its elements and/or attacks make them a bit better.These are the worst dragons of the list. these dragons are a joke in battles having horrible statistics, elements and attacks. Please don't use these dragons.These are the REAL worst dragons of the list. They are totally worthless in battles and just never use them in your life and that's it. Kinda late but i will make my lists whenever i want toThis is my personal opinion btwNext post is either dragons that should have the wind element or the best dragons of 2019Number 10: Lava Lamp DragonI am proud that we got rid of the legendary dragons with only legend as element or only two elements but still what were they smoking when they thought: yeah the fandom wants a lava lamp dragon, kids these days love lava lamps! put it at number 10 because he is relatively good, probably only for water arenas onlyNumber 9: Village DragonThis dragon is boring and so forgettable and the elements arent that good, earth and plant aren't that much op or wellspread, the stell and pure are okay but then you remember primal exists and this dragon is toastNumber 8: Jewel DragonYou have to pay money for this one, money, and it isn't that good like other dragons you buy with real moneyIt's elements are generic like: pure, light, electric and steel seem to be everywhere nowadaysNumber 7:Health: potionA legendary dragon with 3 elements, 1 being useless most of the time, is weak to electric and has a boring design, that was copied 2 times beforeNumber 6:This is a dino in a mech, not a dragon, thats the same reason i dont like most primal dragons, because they are dinosaursNumber 5:BarbarianOne of the worst primal dragons, has the war element twiceYou could have used that space for a better element instead of double warNumber 4:You know you are a bad dragon when you get downgraded from legendary to epic, yes this dragon was a legendary for a short time, it also sucks that the first element is earth when war and steel are so dominantNumber 3:Admirer dragonUgly ugly uglyYou look like a pile of mud on a ballon, and it sucks, it's one of the worst epics of all timeNumber 2:Arctic WindYou are a very rare, with two elements, and your element that has no weakness yet is your 2nd element not the first element so you cant use that great defenseNumber 1: a dino dragonAt least he has wings but damn it sucks, rares with 2 elements now suck and this guy is just weak, very weak 2017 is coming to an end and 2017 was a good year for dragon city it included fantastic dragons ,fantastic events ,the new arena system and of course awfull dragonsYou might be saying : but there's like 1 month till end of year why u making these rn?Well if by the end of 2017 will get even worse dragons I will remake this postAlso I don't make this post to hate on them but only to tell people what dragons you shouldn't useDisclaimer: the dragons might be replaced with worse ones also this list is determined by elements ,rarity and how often I saw them in battle and of course personal opinionSo let's start the list withNumber 10:Hunger dragonReasons why it is bad : it is a 2 elements very rare dragon which it isn't good, very rares should have 3 elements but 2 doesn't make the cutAlso you might say : it has pure element you stupid!But it has it as second so it can't protectIt's first element, ice isn't good. I haven't seen ice dragons to make an impact in a whileSo at the end of the day Hunger dragon is just a dragon worse than rare ones ,worse than flame dragonNumber 9 :BjornFirst dragons from events or collections ,etc are going to be bad,this is the case of Bjorn. I have it in inventory but it will just be a waste of space!There a better commons out there like snail ,super nature,etcElements are meh , a war attack is most likely a 1hit so at the end of the day it's just a Terra dragonNumber 8:SandcastleThis dragon was at a breeding event and worse part,it is a legendary rarity ,very rares can overcome legendsaries easily and the fact that the legend element is missing makes this dragon even worse ,elements don't make senseAnd a 3 element legendary dragons is at the end of the day ,way worse than bad very raresNumber 7:Witch! don't want to say it but witch is just a very very bad dragon ,when it appeared we were supposed to get a legend-fire that is still bad (gonna talk about that later) but we got a 3 element dragon (without legend element),it just sucks ,first it was a disappointment ,second elements are bad ,it just doesn't work ,in the new Terra arena it's a bit good but it just isn't enough to make it better in pvpNumber 6:Skull dragonCollect skulls via packs and adds is boring and it's a waste of money cause this dragon is as bad as the previous one! haven't seen any play of it since it appeared and that makes him a bad dragon maybe later maybe in 2018 there will be something to make dragons like this better but till then it remains a waste of spaceNumber 5(now they are getting extremely bad)Vulpine Dragon.Or how I like to call it the scam dragon ,I spend a total of 45 gems a friend 90 gems and this dragon wasn't even in the book ,it's a total scamPlus legendary rarity with 4 elements isn't good exception: VIPs!t doesn't even have pure(as first element) to protect from dark attacks ,it is kinda sorta good in Pvp but the gem scam makes this dragon a very bad oneNumber 4EgghunterA legendary with 3 elements ,one of them not dealing super effective damage is from start bad!Ways of getting this : an Easter event during most people were with their families or collecting the legend of deus dragonsYeah do I need to say more?Number 3(awfully bad)Satan!It's based of Satan ,that's a bad thing right there!t's a 2 element legendary with one being legend element, you might think it's good but the fire element makes this dragon bad , legend dragons are better than legend with one or two!Other elements, there are more dragons like this but I decided to put only oneNumber 2Archaic dragonOmg it's a VIP that is absolutely bad ,it was supposed to be good but the elements just make this dragon extremely bad! put him on the number 2 spot cause it is a VIP ,you need to pay money when there are always better things!So we saw a horse ,a Terra dragon clone ,a scam. A bad VIP but what can be worse than that?Number 1Power (I have it in inventory too xd)Wow a two elements that is very rare too!What did social point think when they made thisFire element is so useless ,ice and nature most of the time are protected by other elements!Also it can super effective itself cause it's fire-water! make this the worst dragon of 2017 ,never use it!So this list has come to an end if I made a mistake please correct me. Next post is gonna be the top 10 best dragons if 2017!Feel free to put what you think are the top 10 worst dragons of 2017 in the comments .I was your friendly Keyser ,have a good day ALL POSTS!What Is The Worst VIP Heroic To Fight? High Corrupted Time DragonHigh Voodoo Vampire DragonHigh Master Karma DragonHigh Redemption Norn DragonHigh Ascended Supreme DragonHigh Void Eternal DragonHigh Voodoo Vampire DragonHigh Corrupted Time DragonI haven't experienced a lot of these before, but fighting High Master Karma is super annoyingit will FINALLY be low on health after repetitively using Karma Yang or whatever it was and I think i've won, then it dodges the next 2 of my attacks for some reason and I end up losing an important part of my team!HAS,because he is easy to kill.....on rescue2High master karma dragon is broken Skip to main content Reddit and its partners use cookies and similar technologies to provide you with a better experience. Top 10 (1(rarityName)) Dragons In the previous version (old ranking leaderboards), we ranked a dragon depending on how many damages in all trainable moves. Thus, if a dragon has much moves damage, then he will have a higher rank. The new ranking system will combine a rarity, category, special moves, strength and weakness element type, and total damage of trainable moves to rank a dragon. With all the above stats, we hope the rank of each dragon will be more accurate. For example, if you look into the board, you see some dragons have less damage, but he has a higher ranking. Don't be surprised because that is how the ranking is working now. Actually, this board will help you have a general view of all dragons and helping you which dragon should be empowered for your collections. All Dragons Click here How to breed any Dragon How Tos Finding the best dragons in Dragon City is easier said than done - the game has a myriad of elements, and no dragon is limited to having one or two of them, but a maximum of four. That will probably give you an idea of just how colossal the task of naming a single dragon as the best is. But we're no strangers to taking on titanic tasks, and therefore we've compiled a list of all the best dragons currently released in Dragon City. Some of them are more difficult to obtain than others, but that's only because they are so good at pretty much everything. They have a lot of damage, above-average stats, and their skills and elements are also favourable for their type. Now, before we get started, it's worth mentioning a few things. There are a total of six rarities in the game, starting with Common (which has the most common Dragons) and going all the way to Heroic, which are the rarest dragons. I'll list them all below: Common DragonsRare DragonsVery Rare DragonsEpic DragonsLegend DragonsHeroic Dragons Most often, you will want to know who the strongest Legend Dragons are since some of them have the highest stats in the game at the moment. Many of these include the Vampire dragons (Hexed Vampire, Usurper Vampire, Prideful Vampire) but there are others. We've also ranked the strongest Dragoins in Dragon City in the other categories because you're never going to start the game with a Legend, but more likely a Common or a Rare. So, if you want who the best dragons in Dragon City are for each category, kick back and enjoy because we're about to dive right in! Click Here To View The List At the moment these are the strongest Heroic Dragons in Dragon City. Sadly, none of these are breedable, but they can be purchased for a considerable amount of Gems.
