Movie HD installation guide for More Devices Movie HD for Amazon Fire Stick and Fire TV Follow the steps below to run Movie HD Apk on Amazon Fire Stick and Fire TV. The trick shared earlier in this post was long and hard, so I have updated it with a shorter and efficient way. Installing Movie HD to Fire Stick/Fire TV with Android Phone- STEP 1: Turning ADB debugging and Installation of Apps from Unknown sources ON in your Fire TV and Fire TV Stick. Power up your Fire TV and Fire TV Stick and navigate your way to Settings > Device. Set the options for ADB debugging and Apps from Unknown Sources to ON. Now Navigate your way to device> About > Network. You'll see the IP Address of your Fire Stick listed in the right-hand column. Pen it down; we will use this later. STEP 2: Install Apps to Fire on your Android Phone Download Apps2Fire App and Install it on your Android Smartphone. Download Movie HD APK From the Links above and Install it on your Android smartphone. Run Apps2Fire and Navigate your way to Settings Tab; put the IP Address of your Amazon Fire TV Stick or Fire TV. Swipe Across Local Apps and Select Movie HD and Click on Install. Once the app upload finishes, you will see Notification, which says "Movie HD installed" on your Fire TV or Fire TV Stick. Installing Movie HD to Fire TV Stick/Fire TV with PC (Windows, Linux, and Mac)- In this method, we will use ADB Tools to install Movie HD on Amazon Fire TV and Fire TV Stick. Prerequisites : Your Computer and Fire TV Stick should be connected to the same network. Movie HD Apk downloaded into your computer(Download Links Above). Computer with an active installation of ADB tools installed(Download Links Below). Download the ADB Tools for the platform you are using. Windows, Linux, MACINTOSH Now when we have ADB Tools installed, we can start the Movie HD installation process. Launch the Command Prompt in Windows(Press Win+R then type CMD in Run box and Hit Enter) or Terminal on MAC and Linux. Now we need to change the root directory to the location where ADB Tools are installed. Do this by typing cd [path to platform-tools folder]. Now type adb connect [IP address]. Mac, and Linux users will have to add ./ before the command. If you don't remember the IP Address of your Fire TV and Fire TV Stick, then Navigate your way to device> About > Network. You'll see the IP Address of your Fire Stick listed in the right-hand column. For me, it would be adb connect 192.168.0.39. For Mac and Linux users ./adb connect 192.168.0.39. Finally, to install Movie HD, enter this last command, and you will successfully install this app on your Fire TV or Fire TV Stick. adb install [path to Movie HD.apk]. Movie HD for Chrome Cast Watching Movies and Tv Shows in chrome cast would add extra entertainment for the users, but the chrome cast does not support the installation of apps. We will stream movies of Movie HD to chrome cast with the help of an app. So here's how to do it- Download and install Allcast or LocalCast. Download the Movie that you want to stream to Chromecast. Open Allcast or Local cast, whichever you download and select the Movie, then streaming will begin. Movie HD for Blackberry Yes, Movie HD is available for Blackberry devices. Therefore, you can try Video Downloader Apps like VidMate or InsTube to download movies from the apps listed. You just need to paste the URL of the movie or share the movie link with the Downloader App which you wish to download and the rest will be done by the Apps itself.Video downloader Apps that support video and music download from over 100 sources. You can save video and audio files directly in your device storage with the option to choose the resolution and format for the file. And there is no compromise in the pace even when you go for the simultaneous file downloads. The Apps interface is very simple and intuitive with a number of customizable setting options.DownloadData Security and Privacy ConcernsThe free streaming Apps which are not the legal content providers are always on the critical due to data breach and privacy invasion issues. The cyber rouges are always in search of innocent netizens who could fall prey. The use of free non-legal streaming services may also be a crime in your region due to litigations imposed by law.How to Be Safe?Some of the App listed above have a lot of programming with copyright infringement under their hood, you may be under the scanner by your government for streaming the content which is not bided by the law. But looking at the nature of the App, there may be very few who could resist themselves from using it. You can stream safely by using a VPN service. There are a number of VPN Apps and services covering all types of devices.What is a VPN?VPN is a type of online service that hides your data by sending your web usage to another secure location. It forms a secure tunnel to provide end-to-end protection. Therefore, your ISP will not know what you're up to. In other words, it sends your data to a 3rd party country, making it difficult for the service provider to determine the internet behavior of the user.Miscellaneous DetailsIf you wish to use the apps anonymously then you can try any VPN services like OperaVPN which is available on Google Play Store.In case any of the streams show any error or issues while loading then also you can try any proxy servers like VPN to stream the content.If the app is not working or causing some issues then I recommend you to Clear Data & Cache of the app to fix it.Note & Conclusion: Many online streaming apps on the internet are deceiving in nature and they just try to inject malware into your device. These apps ask for permissions that are not required for their normal functioning. For example, apps may ask for permissions which of course is not required to stream the movies.With the Apps, listed above you can not only watch movies but also download them directly on your Android device. They host large volumes of online content that can be either streamed or downloaded on your device. Watching movies offline is a great source of entertainment then you starve of data. With the Apps below you can download movies onto your device storage and watch them offline during non-availability of the internet.I hope the post was helpful.
