How to install this Software Download Video Download Full Setup [54.0 MB] Password: 123 Overview Screenshot Download 2.9 Rated By21 Users License: Shareware (Free to try) Platform: Windows (All Versions) FindMySoft Editor's Review Celtx - All You Need to Go from Script to Shoot The road between coming up with a script and getting started on production is quite long. There's a lot that has to be done and the simple truth of the matter is that you could use all the help you can get. This is where Celtx comes in. Celtx provides all the tools you need to go from script to shoot - tools to write and create, tools to collaborate, tools to prepare for production. The installer you need to run to get Celtx up and running on your PC is little over 13MB in size and that means it won't take long to download it. The setup wizard that shows up when you run the installer will have you pick one of two installation methods: Standard - Celtx will be installed with the most common options. Custom - recommended for experienced users, this installation method allows you to choose individual options to be installed. When you run Celtx, you will be presented with a Welcome prompt. On the left hand side of this prompt you will see a list of project templates. And on the right hand side you will see a few sample projects. I invite you to load one of those sample projects. It will help you get accustomed to the interface and get a better understanding of what can be done with Celtx. Speaking about what can be done with Celtx, here's a quick look at the functionality you can expect to get: works on a script, novel, screenplay, and more; save data to an online workspace; create storyboards and camera setups; create shot lists; collaborate with others; create cast and crew reports; schedule and budget productions, and more. The functionality Celtx has to offer will leave you speechless! Pros Celtx is available for multiple platforms. Installing it on a Windows PC is a simple task; you can choose one of two installation methods. There are multiple project templates to choose from. There are several sample projects that you can play with. Tools to write and create, tools to collaborate, tools to prepare for production are offered by Celtx. Cons None that I could think of. You can download Celtx free here. Celtx Awards Celtx Editor's Review Rating Celtx has been reviewed by George Norman on 20 Jan 2014. Based on the user interface, features and complexity, Findmysoft has rated Celtx 5 out of 5 stars, naming it Essential Celtx Plus 2018 for Mac Free Download Full Version [64] Bit Getintopc Celtx Plus 2018 for Mac Free Download Full Version for PC/Mac/Windows Xp,7,8,8.1,10. It's an Offline Installer and Standalone Setup of Celtx Plus 2018 for Mac Free Download for 32 and 64 Bit. We can also download Celtx Plus 2018 for ... Read More » KIT Scenarist is a program for creating screenplays which oriented at international standards in the field of film production. The program is a full-featured studio for creating stories from the birth of the idea and before the transfer of the script to production. Research Project materials are always at hand Research module of the program is designed so that you can collect all the necessary materials for the project in one place. In it, you can save basic information about the script, such as its name, logline, synopsis, and also fill in the title page of the script. Here you can manage lists of characters and locations. Create new ones, add descriptions, photos, rename and organize them. And, in this section you can store a variety of materials (text documents, images, links to web pages and mind maps) associated with your project, organizing them in a convenient manner. Cards Build an ideal story structure The card module allows you to look at the script in the form of cards spread out on the board, thus providing a visual way to work with the structure. You can arrange the cards on the board in rows, or in columns. You can color them, make notes, group and lay out the acts, and all changes will instantly appear in the text of the script and vice versa. And if you are tired of sitting at the computer, you can print out the cards and work with the analog version of your story. Screenplay Make art and don't worry about formalities The script editor will allow you to think only about the story itself. All the work on formatting the text in accordance with industry standards, he will take oneself. Just two buttons Tab and Enter greatly speed up your productivity with the help of the algorithm for fast changing the format of the paragraph. And if you do not like the standard algorithm, you can configure the program the way it will be convenient for you. The module also includes a navigator for the script, which greatly simplifies navigation through the text. He is able to work with notes, search the text and in general, will be an inconspicuous assistant in all matters of working with the text of the script. And yes, there are no more dances with a tambourine for working with the text in Polish, Chinese, Greek, Hebrew, in any language in the world. You can write in your native language, save and load on it. Simply. Right after installation. Statistics Get detailed information about the screenplay on the fly In the process of working, you can immediately see how many characters, words and pages your story is, as well as the approximate duration of the story and its individual scenes. The program supports three chronometry systems: by pages, by symbols and flexible one, so, you can set up its calculation in the way that suits you best. The statistics module provides an opportunity to get detailed reports on the script, as well as to see the graphs of the characters' activity throughout the script and the dynamics of the scenes so that not a single trifle escapes from you. If necessary, you can save the reports and send them to the producer or to the production company. Friendly Small amenities for your comfort Use a dark or light theme, depending on your preferences and the time of day when you work. Dark is suitable for working in dark rooms, in the evening or at night, and the light will be convenient for work with sufficient light. To prepare a script for publication you will need just two clicks. The program can export scripts in the formats PDF, FDX, Fountain and even DOCX. Advanced export settings allow you to automatically add the scenes, dialogues or pages numbers, create a title page and correct text on the page breaks. Get out of the shelf your dusty script, which you have long wanted to finish and import it into the program. The app will automatically determine the formatting of each block, and in two minutes you will be able to work on it, without wasting time on debilitating formatting. Import supports the formats FDX, Fountain, DOCX, ODT, Trebly and Celtx. And if you want to stay with the text in private, turn on full-screen mode and free yourself for the flight of your imagination.
