Google Play More Games / Apps More Games / Apps HalfLife is one of the giant monuments of the entire FPS industry. and until now, it is still chosen by many people. Because it is a great monument, it is not rare that there are so many titles learned to launch their products. One of the most successful HalfLife games on mobile platforms is Critical Ops – FPS Game for phones. Once it was a web game before being released on mobile platforms, but when it made the appeal of mobile platforms, in 2016, the game was released. This game quicklyand became one of the best FPS games on mobile platforms. The background is familiar This game still follows the path that many elderly have taken to bring the players to the long battle of the terrorist and the anti-terrorist. The player must become one of the two to defeat the other. If you become an anti-terrorist faction, it is the task of fighting and preventing terrorists from bombing important places to win. If it is the terrorist side, you must activate the bomb to destroy strategic positions and win. Men have also relied on this style to attract the attention of players. So this part of the game is not an exception, based on what is available to attract many players to the game. Although it is a familiar style, until now, this is still considered the standard of the FPS game series for players to experiment. The battles that the game brings never made the player feel boring, so there is no wonder that the game is very successful. Vivid 3D Graphics The graphics of the game are integrated 3D, similar to HalfLife when everyone shares the same graphic format. This is not the only thing that makes this game great, but the exciting thing is the sophistication of the image. The images of the game are very sophisticated; all are built and refined to bring the best experience to the player. The more realistic the game becomes, the more the perspective in the first person of the game; this perspective will make the player completely independent from the character to play the game. Eachweapon, armor, and everything else is perfect and nothing to criticize. The context of the battles in the game is also simple, all that take place only in two beautiful cities, Amsterdam and Barcelona. Although there are only two cities, the experience it brings is much better than other games with many other toy maps. Everything that is put in the game is perfect and receives a very high score from the players. Different game modes This game still keeps the typical game mode of this series, which is Defuse mode and Deathmatch mode for players to choose. Each mode has its features to diversify the player's experience. So when you get to the game, players will continue to experience unique things thanks to the ability to change the game modes continuously. In Defuse mode, the players will be divided into two teams: Terrorism and anti-terrorism, terrorists have the task of putting bombs to destroy, and anti-terrorism will have the task of defusing bombs. This is the main task of both teams, and the side that completes the search first wins the game. There are no bombs or anything; this is when individual skills and teammates are combined to win. The task of this game mode is simple that the team who kills all enemies before will win. This is very simple, but not everyone can do it; not only need to have good personal skills, but also know how to collaborate with teammates to support each other. reverse arsenal The element that makes the brandFPS games is a vast arsenal of guns with lots of guns for players to choose from. The game will provide players with an incredibly massive weapons system ready to meet the needs of players. From guns, knives, assault rifles, machine guns and snipers, everything is at stake to fight. Before the game begins, players will have the right to choose a weapon when they are ready for battle. Players choose the weapon they love and are ready to win. win. how to hack critical ops. how to hack critical ops 2020
