Create a new accountForgot your password? The free Online Stopwatch allows you to record split and lap times and edit them without interrupting the timer. You can also save your timings in a text file. Jump to Frequently Asked Questions (FAQ) Getting Started Click Start to start the Stopwatch. To add splits, click Split. You can add as many splits as your task requires. To pause or stop the Stopwatch, click Pause. The Stopwatch will save your time and resume counting from the same point when you click Start. To stop and reset the timer, click Reset. Settings and Sounds Start alerts notify you that the Stopwatch is about to start running. To set the alert, click Settings and sounds. Tick the Count down to start box in the menu that appears, and enter the number of seconds that should be counted down before your Stopwatch starts running. If you need an acoustic signal, add it by enabling the Count down with sound option and selecting a sound in the drop-down menu. Click Settings and sounds and tick the Recurring alert box if you want to be alerted at regular intervals while the Stopwatch is running. The alerts will be repeated at the interval you specify. For example, if you enter 1 minute and 30 seconds, the Stopwatch will make a sound at 1:30, 3:00, 4:30, and so on. Use the Nonrecurring alert option if you would like to be alerted after a certain time has elapsed. Simply click on the Settings and sounds link, tick the box, and enter the number of hours, minutes, and seconds. To add another specific time, click Add. To remove one of the times, click on the cross (x) next to it. The Stopwatch displays a warning message when you reset it. Use the drop-down menu in the warning message or under Show warning on reset in the Settings and sounds menu to define when you wish to receive this alert: Always - The warning is displayed every time you reset the Stopwatch. If Stopwatch has reached X minutes - The warning is only displayed when the total count of the Stopwatch has passed the respective amount of time (5, 15, or 60 minutes). Only when using keyboard shortcut - The warning is only shown when you reset the Stopwatch using a keyboard shortcut. It will not warn you if you click the Reset button. Never - The Stopwatch will always reset without warning, and all your timings will be deleted as soon as you reset. In the Settings and sounds menu, enable Add split on pause if you would like a split time to be added to the list of timings when you pause the Stopwatch. In the Settings and sounds menu, select Enumerate splits if you would like the Stopwatch to count occurrences of each event type (starts, splits, pauses) in the timings list. Enable Show more details to see the numbers. In the Settings and sounds menu, tick Change split labels to enter alternative names for each event type (starts, splits, pauses). These will be the default names displayed in the timings list when you use the Stopwatch. You can always change the label for each event individually directly in the timings list. Enable Show more details to see the labels. The options in the Hide/Show features section of the Settings and sounds menu determine what content should be shown when you click Hide features above the Stopwatch. Tick Always show split time if you want to keep seeing the running split time count even when Hide features is enabled. Use Always show split list to prevent the timings list from being hidden. Enable Always show controls to exclude the Start/Split/Reset buttons from the Hide features function. Note: It is possible to use the Stopwatch with keyboard shortcuts; the Shortcuts menu will show you how. Other Features The Online Stopwatch automatically records all your split times and calculates your lap times for the session. To see them, click Show more details. You can only see this button after you have recorded at least one split or paused the timer. Use the text fields to label each split time with a title of your choice. Rearrange them in the opposite order by clicking on Reverse order. To delete a split, click on the cross (x) at the end of the row. Click Export to save and share your splits, laps, and total times. You can copy the results to your clipboard or download them as a text file in the menu that appears. FAQ: Troubleshooting Make sure you have your volume turned up, and your speakers are plugged in if you can't hear the alert sounds. You can test this by clicking on Settings and sounds and then on any of the Sound check links. If you still don't hear any sound, we would like to hear from you. Please let us know what kind of device, browser, and browser version you are using. The Online Stopwatch uses your computer's time zone to display local times under Time Recorded in the timings list (only shown if you enable Show more details. If the times do not reflect your local time, you will have to select your time zone in your operating system. Don't forget to enable Daylight Saving Time switches if that option is available for your location. Otherwise, the times will be off by one hour for part of the year. Please note that your system's time zone setting is separate from the current time shown on your computer, so you may be using a different time zone even if your computer's time looks correct. If that is the case, the local times in the Stopwatch will not be in your local time. While it is only possible to have one Stopwatch per page, you can set up more than one by opening the Stopwatch page in multiple browser windows. Please note that all Stopwatch windows you open in the same browser will have the same alert and sound settings. To set up multiple Stopwatches with different settings, please open them in different browsers. By the way, our Online Timer allows you to set up multiple timers on the same page. The General FAQ Page answers your questions about timeanddate.com, our services, site-wide settings, customization options, advertising opportunities, and copyright policies. Count down to the New Year, birthdays, weddings, or your retirement Need some help? All Counters & Timers available on timeanddate.com Advertising The free Online Stopwatch allows you to record split and lap times and edit them without interrupting the timer. You can also save your timings in a text file. Online Stopwatch The Online Stopwatch is an easy to use and versatile timer that can be used for sports, cooking at home, at work, or in the classroom. Time a run, a conference talk or the duration it takes for you to cook the perfect steak. Use it to record the total time it took you do a task, the duration between the beginning of your task and at different points while completing it (split times), and the time between two splits (lap times). How Do I Start? Using the Online Stopwatch is easy. Click on the 'play' button to start the Stopwatch. To add splits, click on the Split button. You can add as many splits as your task requires. To pause or stop the Stopwatch, click on the 'Stop' button. The Stopwatch will save your time and begin from the same point you pause it. To stop and reset the timer, click on the Reset button. How Do I Use Start Alerts and Sounds? Start alerts and sounds notify you that the Stopwatch is about to begin recording your time. To set the alert, just click on the Set start alert and sounds link. In the menu that appears, you can choose to set the start alert time to 3, 5 or 10 seconds. This means that the Online Stopwatch will warn you that it is about to begin 3, 5 or 10 seconds before it starts running. If you need an acoustic cue, you can add it by enabling the "Start alert sound" option and selecting a sound in the drop-down menu. How Do the Interval Sounds Work? Use the "Interval sound" option if you would like to be alerted at regular intervals while the Stopwatch is running. Acoustic alerts will be repeated at the interval you specify. For example, if you enter an interval of 1 minute and 30 seconds, the sound will be played at 1:30, 3:00, 4:30, and so on. How Do I Save my Timings? The Online Stopwatch automatically records all your split times and calculates your lap times for the session. To look at them, click on the More Detail link on the bottom right hand side of the timer. You can only see the link after you have recorded at least one split or paused the timer. Editing Split Times You can save your splits and label them with a title of your choice. You can also delete a split by clicking on the delete symbol (red X) at the end of each row. Save as a Text File Please note that the Online Stopwatch will not save your timings if you click on reset or refresh the page. To save and share your splits, laps, and total times, you must click on Export results as text. This will create a text file with all your timings that you can download, save and share with friends, family, and co-workers. Local Time on the Stopwatch is Wrong. What Can I Do? The Online Stopwatch uses your computer operating system's time zone to display local times. If the times shown in the Stopwatch do not reflect your local time, you will have to select your time zone in your operating system. Don't forget to enable Daylight Saving Time switches if that option is available for your location. Otherwise, the times will be off by one hour for part of the year.
