#####PTC Corporate Headquarters Contact InformationThe upcoming INFRA/STRUCTURE Summit 2025 promises to be a pivotal event for the next wave of growth in digital infrastructure. Taking place at Wynn Las Vegas on October 15-16, this sixth annual vendor-neutral conference will bring together global leaders from diverse sectors, including data centers, cloud, hyperscale, colocation, edge, and AI infrastructure. The Mobile Ecosystem Forum (MEF), a global trade association, is collaborating with INFRA/STRUCTURE Summit to provide exclusive networking opportunities and independent research-driven insights. MEF members, which include companies powering the mobile ecosystem, will have a collaborative platform to elevate their industry presence, build meaningful partnerships, and shape the mobile industry's agenda. Two prominent exhibitors, AIRSYS Cooling Technologies and INNIO Group, are expected to showcase their innovative solutions for thermal management in high-density digital infrastructure. AIRSYS aims to advance infrastructure while reducing environmental impact through its "Balance the Environment" mission. INNIO Group offers flexible, scalable, and resilient energy solutions and services that enable industries to manage the energy transition. The summit will also feature a keynote speaker, Ivo Ivanov, CEO of DE-CIX and Chair of the Board of DE-CIX Group AG. With over 20 years of experience in the regulatory, legal, and commercial Internet environment, Ivo is expected to share his vision and thought leadership on interconnection and digital infrastructure. Additionally, Tony Mosley, Director of Business Development for Ocean Specialists Inc., will be a notable speaker, bringing his expertise in telecommunications operations and experience in leading international telecommunications properties. Michael King, Director of Data Center Strategy for Cloudfare, will also present, having founded the team responsible for all of Cloudfare's relationships and spend across the data center industry. i3Forum, a non-profit industry body, will be attending the event to promote industry-wide collaboration and open up opportunities for transformation across the international communications ecosystem, model focused on enabling success in a changing market. Tony Rossabi is Founder and Managing Member of OCOLO a unique and innovative marketplace for data centers. Tony is the former CEO and a Board Member of Recovery Point Systems RPS a provider of data center and recovery services. Tony is an Independent director for Connectbase Vantage Data Centers 1623 Farnam C-Connex and Contract Leasing Corporation. With more than 25 years of experience driving growth and innovation for technology and telecommunications enterprises, Tony has guided several companies to successful turnarounds and exits. Prior to RPS, Tony worked for TierPoint as Executive Vice President and Chief Revenue Officer where he was responsible for overseeing revenue growth, managing the daily operations of TierPoint's national sales organization, and devising the company's strategic plan. He was part of the 3-person executive team that raised \$325 million to drive the company's growth. Prior to TierPoint, Tony served as Managing Director for Digital Realty Trusts, colocation and connectivity business unit, and earlier was Executive Vice President of Sales, Marketing and Strategy for Telx Group Inc. acquired by DRT. In 2015, Tony was part of the executive team that sold the business to Digital Realty Trust for \$1.98 billion, realizing a 43% IRR. Tony supports several organizations as a member of non-profit boards, including the Pacific Telecommunications Council (PTC) and the Board of Surgeons Overseas. Past Corporate Board roles: PCTEL (formerly listed on NASDAQ, acquired in December 2023), National Express, Wash and Qarbon Technology. Tony holds a BA in Business and Juris Doctor (JD) degrees. Sean Bergin has been instrumental in building APTelecom into a globally recognized leader in telecom and fiber consulting, elevating from a start-up business to an award-winning global organization which has generated over \$250 million in sales for clients. Sean has significant management experience at both national and international levels. At Telstra, BT, and Hutchison, Sean has covered lived in a multicultural environment, managing a team of primary and emerging markets across Asia, the Middle East, Australia, and Europe. Along with APTelecom Co-Founder and CEO, Eric Handa, Sean has generated over half a billion dollars in sales for clients throughout his career. Sean is also a member of the Board of Governors for the Pacific Telecommunications Council. Paul is based in Asia and leads a sales strategy and business development team accountable for GCX's wholesale business globally. Prior to GCX, Paul led Telstra's global wholesale business for a decade, more than tripling its EBITDA through several new subsea builds, the acquisition and integration of Pacnet, the restructure of the Reach joint venture, and re-entering India and Southeast Asia. In mobiles, he was also one of the key leaders on the transformation and sale of HK mobile carrier CSL and the Digicel Pacific acquisition. Gary Kim is a telecommunications industry analyst with 35 years of experience, ranked among the top 10 telecom thought leaders. He has consulted for a number of industry suppliers, service providers, and channel partner organizations globally. Nearly all his consulting work has been for companies in competitive parts of the digital infrastructure market: cable TV, competitive local exchange carriers, bandwidth suppliers, channel partners, independent Internet service providers, and mobile service providers. He provided analysis of markets for France Telecom, Sprint, Cablevision Systems, TDS Telecom, Korean Broadcasting System, and Nortel. Advancing several access technology firms and service providers, CableLabs, Pennsylvania Cable TV Association, and several channel organizations, among others. Eric Handa has built APTelecom into a globally recognized leader in telecom and fiber consulting. Since launching in 2010, Handa has grown APTelecom from a startup business to an award-winning global organization which has generated over \$650 million USD in sales for clients. APTelecom has been named the Sales Team of the Year by the Global Customer Sales and Service Awards and has won multiple other accolades, including the Silver Award in the Network Products Guides' 10th Annual 2015 Hot Companies and Best Products Awards Bronze Winner for the Best in Biz Awards 2015 International and the Silver Award Winner for the 2022 Fastest-Growing Company (EMEA) by the Best in Biz Awards. Darren currently holds the position of Head of Marine Maintenance within Optic Marine Group, leading the Marine Maintenance portfolio across the fleet spanning the Atlantic, SE Asian, and Pacific regions. Having experience in both commercial and operational positions across his initial time working for Alcatel Submarine Networks and now with Optic Marine Group, Darren brings invaluable knowledge and experience of working and cultural relationships within the various regions and understands the difficulties the industry faces in each of these areas. Darren is driven to improve cable resilience, protection, and improved techniques to support efficient repair durations and resolutions for customers' business and regulatory developments worldwide. For more information on our products and to sign up for free trial subscriptions, go to www.satellitetoday.com/via. Telecom Review Asia Pacific has gained a stellar reputation for guaranteeing quality content, offering reliable information, and addressing the most trending topics in the region. It is today a pioneer and leader in the ICT media industry. Its weekly e-newsletters have the highest open rate and the most influence in the ICT industry, making it an influential media tool. Telecom Review Asia Pacific also publishes bi-monthly digital flipping magazines and organizes virtual panels and webinars. Telecom Review Americas provides in-depth coverage of the latest ICT trends in the North, Centre, and South of the Americas, with its up-to-date content including industry break news, exclusive interviews with C-levels, opinion articles, and event coverages, all relayed on its website, social media accounts, e-newsletters, and flipping e-magazine. Submarine Telecoms Forum is the submarine cable industry's first electronic, dedicated magazine, RSS feed, streaming video service, and the platform for discourse on submarine telecom cable and network operations, and our authors and advertisers enjoy unequalled market visibility. SubTel Forum is free to its 60,000+ readers in 115 countries. Celebrating over 16 years of success, JSA is the preeminent provider of Public Relations, Account-Based Marketing (ABM), Lead Nurturing, and Event Planning services to the telecom, data center, and tech industries. Our success is attributed to our skilled JSA team, innovative tools, and established media and industry relationships. Combined, these allow us to deliver the industry's gold standard in content creation, media outreach, digital marketing, and brand strategy services available. InterGlobix Magazine is the first magazine of its kind, focused on Data Centers, Connectivity, Luxury, and Lifestyle. An ode to the data center industry, it recognizes the key shapers behind this relatively young industry. It delves deep into the lifestyle of the most successful industry personalities, providing our readers their personal stories. An indispensable guide for industry enthusiasts with a unique blend of industry experts' opinions, datacenter technology innovations, subsea-terrestrial fiber sectors, and lifestyle elements. iMiller Public Relations (iMPR) is a leading international public relations consultancy specializing in the global digital infrastructure industry. Our comprehensive services, including strategic communications, messaging strategy, and content marketing, have consistently delivered game-changing results for telecom and technology companies, collectively representing over \$100 billion in annual revenue. Visit www.imillerpr.com to elevate your brand's visibility and drive engagement. The Data Center POST provides a comprehensive view of the digital infrastructure landscape, delivering industry insights into the global data center ecosystem. As the industry's only peer-contributed and online publication, we offer relevant information from developers, managers, providers, investors, and trendsetters worldwide. Data Center POST works hard to get the most current information and thought-provoking ideas most apt to add relevance to the success of the data center industry. Stay informed, visit www.datacenterpost.com. CommsUpdate is TeleGeography's free daily summary of major telecom news stories worldwide, delivered by email, Twitter, and via commsupdate.com. CommsUpdate is designed for busy telecommunications executives and decision-makers who need an at-a-glance summary of the top news of the day. You can subscribe for free here. SubOptic is an industry-leading and driven association. Focused on the fiber-optic subsea ecosystem, SubOptic works to effectuate vital advancement, education, and collaboration across the greater global communications infrastructure industry. By creating and driving participation across working groups, forums, conferences, and educational partnerships to aid in overall industry workforce development and sustainability, SubOptic delivers critical avenues for the alignment, improvement, and future of the subsea industry. The Nomad Futurist Foundation is a 501(c)(3) nonprofit dedicated to demystifying digital infrastructure and the technologies that shape our daily lives. We aim to inspire and empower the next generation by exposing them to the systems powering the digital world. In partnership with educators, NGOs, and nonprofits, we launch global programs focused on underserved communities—promoting diversity, inclusion, and new career pathways through education and awareness. Founded in 2000, Capacity Media is an essential source of news and events in today's telecommunications wholesale carrier and service provider marketplace and focuses on the critical business issues that carriers face in the rapidly changing telecoms market. Through its portfolio of Capacity magazine and 24 large-scale global events, including Capacity Europe, International Telecoms Week (ITW), the Global Carrier Awards, as well as networking receptions, carrier directories, and an online news source, Capacity Media is a vital source of business intelligence for the global carrier industry. APSCC is a non-profit international association representing all sectors of the satellite and space-related industries. At the forefront of shaping the future of the satellite and space industries, APSCC offers a collective voice for the industry in Asia and the Pacific, provides a forum for discussing key issues, and produces and distributes industry news and information. For more information, please visit www.apsc.or.kr and www.apscsat.com. ACC is Asia's most sought-after telecom and ICT event, bringing together the world's leading telecom operators, technology providers, and industry pioneers. For 21 years, ACC has served as a dynamic platform for collaboration—driving innovation, forging strategic partnerships, and shaping the future of connectivity. AdaniConneX is a joint venture between Adani Group (India's largest private infrastructure and energy provider) and EdgeConneX (world's largest private data center operator) to empower digital India with a 1 GW. The world of data center capacity is set to undergo significant changes over the next decade, with Paul Hastings LLP playing a key role in shaping this future. As a global law firm with 22 offices spanning the world's leading financial and commercial centers, our Telecommunications, Media and Technology Practice is well-positioned to navigate the complexities of data center development and operations. With over 35 practitioners, our team has broad expertise across all subsectors of telecommunications, including structuring and financing projects, regulatory counseling and advocacy, commercial transactions, regulatory and corporate compliance, and legislative representation. Our practice is international in scope, and we are actively expanding our reach to meet the growing demands of this sector. The World Teleport Association (WTA) has been at the forefront of promoting the business of satellite communications since 1985. As a leading trade association, WTA brings together world-class operators of teleports, from independent companies to multinationals, and niche service providers. Our analysis is crucial for telecom service providers, large enterprises, government agencies, and research firms, providing them with valuable insights into submarine cable investments, cloud-based networks, international markets, and competitor benchmarks. In addition, Telecoms World Asia and Submarine Networks World offer unique opportunities for networking and knowledge-sharing among industry professionals. These premier events provide a platform for Asian telcos to discuss the future of telecom networks, 5G rollouts, digitization of customer services, and more. Meanwhile, our International Telecommunications Society (ITS) brings together professionals from diverse sectors, including telephony, computing, Internet, broadcasting, content, and related industries. The Asia Interconnect World 2025 event promises to be a game-changer for connectivity infrastructure leaders in the region. With over 500 senior decision-makers expected to attend, this exclusive gathering will provide unparalleled opportunities for partnership, innovation, and networking in Tokyo, Japan. Lastly, APTelecom is a leading facilities-based telecom consulting company that specializes in global connectivity, cloud solutions, and emerging market advisory services. By combining superior quality with cost-competitive products and strategic advisory services, APTelecom improves networks, facilitates growth, and manages change for its clients across various sectors. Mohali, officially known as Sahibzada Ajit Singh Nagar or Ajitgarh, is a planned city located in the Mohali district of Punjab, India. It serves as an administrative and commercial hub, situated southwest of Chandigarh. The city was named after Sahibzada Ajit Singh, the eldest son of Guru Gobind Singh, and has developed rapidly into a prominent IT hub of the state of Punjab. continental monsoon climate characterized by seasonal rhythm, hot summers, slightly cold winters, unreliable rainfall, and great variation in temperature: -1 to 44 °C or 30 to 111 °F. In winter, frost sometimes occurs during December and January. The average annual rainfall is recorded at 617 millimetres, twenty-four point three inches. The city also receives occasional winter rains from the west. #####ARTICLEThe Punjab Cricket Association Stadium is a cricket stadium located in SAS Nagar, Mohali, Chandigarh, India. It was constructed at an estimated cost of ₹25 crore and took approximately three years to complete. The stadium has an official seating capacity of 30,000 spectators. Designed by Arun Loomba and Associates, Panchkula, the stadium features unique lighting systems that are low in height to avoid aircraft collisions from nearby airports. The stadium is also situated near the stream N Choe, which passes through the central part of Chandigarh. The Punjab Cricket Association Stadium serves as the home ground for the Punjab Kings IPL team franchisee. The current pitch curator and design consultant are Daljit Singh and Ar. Sufyan Ahmad, respectively. Mohali is a popular tourist destination in Chandigarh, offering numerous attractions such as Fateh Burj, Gurudwara Amb Sahib, Shiv Mandir, Dargah Sharif Bakarpur, Nature Park, Rose Garden, and more. The city also features several parks, including the Punjab Cricket Association Stadium. Friedreich's ataxia (FA) is a rare, inherited neurodegenerative disease primarily affecting the nervous system. It causes progressive spinal cord, peripheral nerves, and cerebellum damage, leading to impaired muscle coordination, difficulty walking, and other neurological symptoms. The FDA has given PTC Therapeutics' application for vatisquinone priority review, with an expected action date of August 19, 2025. The company submitted the application in December 2024. As a result, the stock price rose by 4.89% to \$52.23 at the time of publication on Tuesday, according to Benzinga Pro data.
