It was nice when I downloaded the Wynk music app. At the first place I didn't knew I could download the songs which I liked/enjoyed throughout the day. And the second I love the way when the Wynk could download the all musics and store it in the app and play it when I feel to listen the music which I preferred . Finally this app made my depression,anger,frustration and ego go like a wind and say bye for all this. I recommend to all people who feel lonely, anger ,frustration at some time ,they must feel free to listen and give a time for the music while they are riding , walking or simply sitting. Therefore I would conclude that this app can make a man to smile or calm his mind .. All the best who listens and have a nice day by listening the songs which they preferred to listen.....!!!! App is showing songs in unfinished downloads which I have downloaded already and making me download again.. and app shows some songs in unfinished downloads but when I hit that it has no songs under it...really annoyed by bugs..also the song order feature is not working.. when I hit song order based on date added it's not showing that way and making it in random order.. because I have Airtel sim I'm using this app.. it has become real bad in course of time.. when I started using it this is like best music streaming app.. but now it just has bugs.. also when I hit on following some particular artists it shows in my follows but when I close and open app they are no where to be found on my following list.. only letting people follow popular artists not letting people follow faves.. But def have to give kudos to the song quality.. really awesome tho.. also need more artists, like you have Loren gray but you don't have Emma blackery and people like that?? hope the developers team responds quickly “Uh oh!This is not what we want you to experience. :(Let us turn this thing around and put a smile on your face. :)Allow us to extend a helping hand by reaching us through 'contact@wynk.in' and hopefully we can find a way around this.Thank You! Guys, the app is great and the collection is great, HOWEVER, when you try to play a playlist, soon you discover that it starts paying songs outside of the playlist! I wasted a lot of time trying to figure the fault in this because I had curated s king playlist. Then i discovered recommended songs that is on by default and then you have to go turn it off. It doesn't stop there, you have to clear the queue, again load the playlist and disable the automatically play recommended songs.. I almost abandoned the app and started exploring other music apps but the problem is, I have invested a long time curating that playlist.. Please rectify this really irritating bug (in your mind it might be a feature, but bear in mind, you might automatically play recommended songs for a person who is playing a single song, but when one loads a playlist, the whole effort is defeated, especially when you are driving). Hope somebody listens and rectify this. Hey!We want to improve and evolve everyday so all suggestions are welcome! Your feedback helps us work on our application so that our users can have a stellar experience in every aspect. Moreover, we have noted down your review. -Thank you.
