14. SEND Consultant (£30,000-£55,000) - Background in special education
15. Project Manager (£30,000-£55,000) - Organisation, leadership, & problem-solving skills

Want to teach English online? Read on to discover more about these exciting career paths for ex-teachers and educators in the UK! As an ex-teacher looking to stay within the education sector, there are several career paths you can consider. One option is to provide student learning support, where you'll work with students who need academic assistance or mentorship. This role often involves working in schools, tutoring centres, or online platforms, and requires teaching experience, strong communication skills, and expertise in curriculum subjects. Another path is private tutoring, which allows you to tailor your approach to each individual student's needs. You can choose to work in-person or remotely and specialize in the subjects you enjoy teaching most. This role typically requires teaching experience, subject knowledge, and adaptability. If you love teaching but want a less demanding role, education liaison might be an option. As an education liaison, you'll develop educational materials that are fun and effective, acting as a bridge between publishers, educators, and schools. Alternatively, you could explore corporate learning and development roles, where you'll create and deliver training programs for employees. This requires great communication skills, proficiency with e-learning tools, and familiarity with LMS platforms. National average salaries range from £23,000 to £46,000 for these roles, depending on the specific position and employer.

Teaching Skills Translated into Valuable Career Paths as Former Teachers Explore Alternatives Here are some career paths that can be a good fit for former teachers:

1. Museum Professional - Create engaging exhibits for visitors of all ages by working with art, history, science, and culture.
2. Technical Writer - Convert complex tech info into user-friendly guides through excellent writing and communication skills.
3. Career Coach - Help clients achieve their career goals by applying teaching skills in a new context.
4. Teacher Trainer - Design training programs for teachers, helping them develop their skills and stay updated on the latest methods.
5. SEND Consultant - Support students with special educational needs and disabilities (SEND) by working with schools, families, and local authorities. You'll find that your skills as a teacher will serve you well in this role.

As a project manager, you'll oversee various projects from planning to execution, ensuring they're completed on time and within budget. Typical Salary Range: £30k-£55k. A strong background in special education is essential for Send Consultants, along with a degree in special education or educational psychology. Good communication, problem-solving, and advocacy skills are also required. If you're thinking of transitioning to a new career, don't worry - it's not always a straightforward process. You might need additional training or qualifications. Start by researching the requirements for your desired role. In some cases, your degree, experience, and employer reference may be enough. Considering a change in careers? Check out these industries, which are actively seeking new employees. Transfer your teaching skills to a new profession by identifying the skills you possess and matching them with available roles. For example, if you're interested in a counselling-based role, patience and understanding will serve you well. However, private tutoring only requires teaching talent, while corporate or industry-specific roles demand relevant training or degrees. Before making the leap, speak with a career advisor and research retraining options after teaching. The public sector is still a significant employer in the UK, offering many opportunities for ex-teachers to apply their skills. Some popular public sector careers include:

- * education administrator
- * social worker
- * youth worker
- * training and development officer
- * careers advisor
- * educational psychologist
- * local government officer
- * public health educator
- * community education officer
- * library services policy advisor

The private sector also offers exciting opportunities for ex-teachers, including:

- * corporate trainer
- * human resources specialist
- * instructional designer
- * educational consultant
- * content writer/developer
- * sales representative
- * private tutor
- * curriculum developer

Going back into education can seem like a daunting task, especially if you're thinking of switching careers after teaching UK students. However, it can open up new opportunities for those who want to pursue a completely different path. Whatever career you choose to follow teaching, make sure you focus on something that genuinely interests you, as this will lead to better results and job satisfaction. Being a teacher can be tough, with endless lesson planning, marking, and administrative tasks piling up. This workload is taking a toll on many teachers, who feel stressed and burned out. A report by the National Education Union (NEU) highlights that the unmanageable workload is driving teachers to leave the profession. With limited support, resources, and opportunities for career growth, it's no wonder they're seeking a change. Many teachers struggle to achieve a work-life balance due to the demands of teaching. Additionally, teachers often feel undervalued and financially strained because of their relatively low pay. A study by the National Foundation for Educational Research (NFER) found that teachers who left the profession earned about 10% more in their new roles. Teaching can also be emotionally draining. A report by the NEU revealed that 81% of teachers considered quitting due to workload pressure. The stress of standardised testing and OFSTED inspections only adds to the disillusionment with the education system. If you're thinking of leaving teaching, don't worry - you're not alone. Many teachers have already made the transition, and there are plenty of alternative careers that can utilise your skills and experience. Let's explore some exciting new opportunities outside of the classroom!

Thinking of a career change within the field of education? There are many jobs available for qualified teachers that let them use their qualifications and skills. Some examples include:

- * Private tutoring: Providing one-on-one instruction to students in a specific subject area, tailored to their individual needs.
- + Salary: £20 - £50 per hour
- + What ex-teachers love about the job: The flexibility, personalised approach, and building strong relationships with students and families.
- + Stuff to think about: You might need to build a client base and market your services as a freelance tutor. Check out Tutorful for help finding students!

- * Educational consulting: Advising schools, organisations, and individuals on various aspects of education, like curriculum development, teaching strategies, and policies.
- + Salary: £30,000 - £60,000
- + What ex-teachers love about the job: Influencing educational practices on a larger scale and the variety of projects.
- + Stuff to think about: A master's degree or additional certifications in your area of expertise might be necessary.

- * Other roles that utilise teaching skills, with salaries ranging from £25,000 - £50,000. These are just a few examples of the many career paths available for teachers. By exploring these new opportunities, you can find personal and professional growth outside of the classroom!

Ex-Teachers Can Thrive in Diverse Roles Beyond the Classroom Developing and delivering training programs for businesses, creating educational materials, designing museum programs, researching educational content, writing textbooks, and guiding career seekers are just a few examples of alternative careers available to ex-teachers. These roles leverage the skills, expertise, and passion of educators in various settings. Some key considerations for those looking to transition into these fields include:

- * Experience in a specific industry or additional certifications
- * Familiarity with e-learning authoring tools and learning management systems
- * Subject matter expertise and experience in informal learning settings
- * A strong writing portfolio and subject matter expertise
- * A postgraduate qualification in career guidance

The salary ranges for these roles vary, but most fall within the £20,000 to £55,000 range. Ex-teachers can use their skills, experience, and passion to make a difference in various corporate settings. As an ex-teacher, you possess top-notch organisational and time management skills that can be leveraged in various industries, such as project management, where you can coordinate teams and ensure projects are completed on time. Pursuing a certification like PRINCE2 or PMP can enhance your credibility. In sales roles, your communication and persuasion skills shine through when presenting products or services and building relationships with clients. While specific qualifications may not be necessary, industry knowledge or sales training can be beneficial. Event planning is another area where you can utilise your organisational skills and creativity to plan successful gatherings like conferences, weddings, or corporate events. A degree in Event Management or relevant certifications like CMP or CSEP can be advantageous. As a public relations professional, you can leverage your communication skills to create a positive image for clients, companies, or organisations. A degree in Public Relations, Communications, or a related field, along with certifications like CIPR or PRCA, can be helpful. Before making the leap from teaching, consider exploring transferable skills and potential new career paths that align with your passions. If you're interested in private tutoring, Tutorful offers flexible online or local options for qualified teachers. As you contemplate a new career path, remember that your teaching skills are highly valuable and in demand. Whether staying in education or exploring a different field, your expertise will continue to be sought after. If you're ready to transition out of the classroom, don't worry - we've got tips to help you make a smooth switch. First, highlight your transferable skills like communication, problem-solving, and adaptability on your CV and in interviews. Next, do your research by networking with professionals in your desired field, attending events, and joining online forums. Update your CV and LinkedIn profile to showcase relevant experiences and achievements. Consider taking courses or getting certified to boost your credibility. Gain hands-on experience through volunteering or interning before making the leap. Don't be afraid to ask for support from friends, family, and professional contacts during your transition. Stay positive and patient, even in the face of setbacks - they're just learning opportunities! The shift in focus from school culture to data-driven benchmarks has led many educators to feel undervalued and disconnected from their profession. However, Ian believes that it's not teachers losing their passion for teaching, but rather the system itself driving them out of traditional classrooms. Ian, a private tutor, notes that while teaching can be rewarding, it's not everyone's cup of tea, and those who still have a fire for teaching are finding alternative ways to channel their passion. He emphasizes the importance of modern technology in making lessons more engaging and personalized. Ian credits online tutoring with expanding opportunities and breaking geographical barriers. With the internet, tutors can now reach students from diverse locations and time zones, creating a global network of learners. With great power comes great responsibility, as Spiderman's Uncle Ben would say. This means being mindful of different time zones and languages when scheduling sessions. While it may not be a straightforward transition, with some careful planning, you can maintain a full schedule that suits your needs best. It's essential to remember that you're not alone in this journey; finding your tribe is crucial. Join support groups or connect with other private tutors to gain valuable insights and helpful tips. The shift from school teaching to private tutoring involves more than just the work itself; it also requires a lifestyle change. You'll need to adapt to spending time working alone, without the camaraderie of colleagues or constant student interaction. However, this can bring greater focus and productivity. As you navigate this new career path, remember that your skills as an educator are highly valued and applicable to various professions. Take time to reflect on what matters most to you and research different careers before making any significant moves. And don't forget to lean on your support network for a boost of encouragement throughout the process. In 2020, a staggering 34,100 qualified teachers left their profession, primarily due to career changes, with 87% of these departures attributed to this reason. Conversely, 85% of newly qualified teachers remained in their roles one year after certification. Notably, only three out of five teachers who qualified ten years prior continued teaching today. The average teacher salary in state-funded schools increased by 3.1% to £41,799 in 2020, significantly higher than the median annual pay for full-time UK workers (£31,461). Despite this, many teachers are opting for alternative careers due to factors like long working hours, excessive marking, and incompatibility with family life. Teachers' high levels of education and skills make them attractive candidates for other industries. The teaching profession's demanding nature, including 50-hour workweeks, considerable paperwork, and high stress levels, has led many teachers to seek better work-life balance elsewhere. Teachers often assume that their job will fit well with family life, enjoying breaks like Christmas and Easter as well as half-term holidays. However, many teachers who become parents realize that once their kids are of school age, their classroom hours make it difficult to participate in morning drop-offs or afternoon pick-ups. This might lead to additional expenses for wrap-around childcare or relying on friends and family for transportation to school. Many people find teaching to be a stressful job due to the constant balancing act with a lot of responsibility and little recognition. Stress can also stem from pressure to achieve targets and perform well under inspections by governing bodies like Ofsted. According to statistics, out of 140,000 work-related ill health cases in education, over half were related to stress, depression or anxiety. Class sizes have been increasing since 2016, making it challenging for teachers with a pupil-to-teacher ratio of 16.6:1 in secondary schools and 20.6:1 in nursery and primary schools. Despite the challenges, teachers are highly educated individuals who possess good spelling and grammar skills, as well as the ability to communicate clearly. This puts them at an advantage during job applications, allowing them to create a coherent and professional CV and written application. In addition to their work experience and educational qualifications, teachers may want to highlight transferable skills like multitasking, organisational skills, and interpersonal abilities. If your teaching experience is the primary focus of your work history, you've likely developed skills that can be applied to a variety of careers. If you're considering a career change, it's essential to plan strategically and think about what you want to achieve in your new role. Rushing into a decision without careful consideration may lead to a series of unfulfilling jobs or the need for retraining. Whatever motivates you to leave teaching should be centered on achieving job satisfaction. To ensure a smooth career transition: Develop a plan with achievable goals and a realistic timeframe to stay focused and motivated. Determine what you want - a change from a classroom environment, a departure from education entirely, full-time or part-time employment, or self-employment? Research potential careers by browsing job sites, reading relevant blogs on changing careers or life after teaching, and exploring online opportunities. Assess your finances - can you afford to be out of work for an extended period? What are your expenses, and could you reduce them if needed? Are you in a position to take time off to study? Consider your individual circumstances - will you need to relocate or prioritize childcare options? Seek the guidance of a career coach, who can help identify your goals and support you through the transition. Although their expertise may come at a cost (over £50 per hour), a third-party perspective can be invaluable if you're feeling uncertain. Evaluate your skillset and qualifications - are there other roles that align with your abilities? Consider alternative options during evenings or weekends, such as tutoring, freelance writing or editing, or volunteering at museums, libraries, or art galleries. Teaching professionals seeking alternative careers may explore administrative roles within education institutions. Office positions like manager, assistant, principal's P.A., and student support officer could be suitable options. Alternatively, they can leverage their teaching experience to transition into non-educational roles that utilize their skills and passion for helping others. These might include social work, youth work, probation services, child psychology/therapy, or charity work. For those who want to remain in the education sector but shift away from working with young people, various business-related roles require teaching essential skills to adults. Business coach, health and safety adviser, financial adviser, policy adviser, and project manager are examples of these jobs. To succeed in these areas, former teachers may need to acquire new skills and qualifications, but they will also draw upon many existing skills and attributes. Some job roles may only require on-the-job training, enthusiasm, and the application of transferable skills acquired during their teaching career. Potential alternative careers for teachers include art gallery or museum guide, freelance writer or blogger, life coach, administrative positions like secretary or P.A., local government employee, HR manager, editor/proofreader, and more. The suitability of these roles depends on the teacher's original specialism and interests. A wide range of career choices await those who are willing to make a change, with many opportunities emerging in fields that align with their teaching expertise. For ex-teachers seeking similar financial prospects, various options exist, such as museum guiding or office administration, which may require a pay reduction but offer reduced stress and workload. Freelance work, like writing or coaching, provides flexibility, yet no guaranteed income stability. Social work and probation service careers, however, offer comparable salaries to teaching with drawbacks including bureaucratic hurdles, extended working hours, and heavy caseloads. This type of work can reinvigorate teachers who've lost passion for education but still wish to make a positive impact on young lives.
