PF Auto-Typer is a one-of-a-kind program. Indeed, its features will be helpful and are all easy to use. Developed by Beneton Software, anyone owning some minimum programming language level can seamlessly use it. PF Auto-Typer is a key press simulation program. It is useful when you want to chat with contacts in an instant messaging client and do something else at the same time. It seems to be quite difficult but the software's interface makes its handling effortless and easy to handle. There are many features included in it, making it efficient. For instance, you can set delay time, key-press speed, create loop of text and so many others. The basic principle of PF Auto-Typer is that it reads a defined text and pastes it in a field you have designed. PF Auto-Typer features PFATL, a built-in programming language module, which is meant to enlarge the program's abilities in files processing, mouse control and how to send message are going to be displayed. Is It Free? Please note that only the trial version is free. Alternative spelling: pflat-4.exe, pflat.exe Latest update on November 30, 2020 at 04:56 AM by Elena Keracheva. At least once a day, run its database update program. This will allow your antivirus to stay up to date with the latest badware threats and better protect your computer data. If you don't have a powerful antivirus solution already protecting your computer, you should install one from our recommendations: Avast Free, AVG Free, Avira Free, Bitdefender, Kaspersky (50% Discount), NOD32. 2. Choose a safe web browser An important aspect to keep in mind is what web browser you use. Most browser exploits and viruses target Internet Explorer so it's best you consider an alternative. The safest web browsers available Today are considered to be Mozilla Firefox and Google Chrome. Besides being free, they are both fast, have pop-up blocking, tabbed browsing, with privacy and security features. Give them a try: Download Mozilla Firefox or Download Google Chrome. 3.
