The famous Professor Elm has been busy with several new findings, among them the legend of the miraculous stones that did reach the Pokémon a higher level, due to this resorts to two of his assistants, Ethan/Kris and [Player], to deal with the operation of these, giving them a Pokémon for this. After sending [Player] to pick up a package with Mr. Pokemon, a mysterious red-haired guy steals a Pokemon in your laboratory. Now Ethan/Kris [Player], which received a Pokedex from Prof. Oak, will undertake a travel around the Johto region to complete the Pokedex and know who was that redhead boy and why he stole the Pokemon. If you get bored with some easy Pokemon hacks... Zeta Omicron is the game that will satisfy you with its upgraded difficulty. Be careful, you will face many different strong opponents on the way to become the ultimate Pokemon Champion! About the Project Hello everyone, I'm Overford Kaktus/Gold/Ruki Studios. Probably you remember me for other projects like Pokémon Ragnarök (Or maybe not hahaha). I'm a Spanish-speaker romhacker and a former GBC romhacker (from 2010 to May 2014). This time I'll show to you guys an old project that I decided to restart, and I really hopw this project would be finished. This project was started around late 2010. At that moment the project was only an "idea" that was stopped in 2015, but now it was redone from scratch. The project is highly inspired in the Chaos Rush's hack "Pokemon Dark Violet". in other words, this hack is also a "reboot" (Or try to be) of Pokemon Gold, Silver and Crystal, making many of the events from scratch and showing a new storyline keeping the essence of the original story, with a heavy inspiration of the original HGSS remakes and some concepts seen only in Polished Crystal. Keep in your mind, this isn't a remake like Liquid Crystal, CrystalDust or ShinyGold. This intends to be a reboot from Pokemon Gold and Silver, using some ideas from Pokémon Crystal and HGSS, making a unique and unseen story of Johto. Storyline I have no idea how to describe the main plot and storyline since many events are essentially the same form HGSS/GSC, so we can at least assure the plot may remain the same (Tbh is not the same, but at least you may get a surprise by playing the game. What is New? Proudly powered by the Complete Fire Red UpgradeA renewed storyline, keeping the essence of the original games. New events never seen before in any GSC remake. Maps based of HGSS ones. Introducing the Mega Evolution mechanics in the main storyline + Z Moves during the Kanto Post game (Maybe Dynamax/Gigamax, idk). RZE tile system. Day and Night system and day/time-based events. Wild Pokémon switching depending on the time. Original soundtrack ripped from HGSS (Initially used Gogoj3Tech's low quality music, but I decided to rip them by myself with a way better quality). Physycal/Special split moves. New Regional Pokedex including 494 Pokémon from first 4 gens + Sylveon. Introducing the PokéRides, items that replace the outdated HM mechanics. All new Gen 4-8 Moves included, a few custom moves are included. Type chart updated. New puzzles for some areas. Plenty of updated graphics (like Battle backgrounds, bag, Trainer card, almost everything.) Most trainers use different rosters from original HGSS/GSC to match new Pokedex New locations in Johto and Kanto. Updated battle mechanics to match gen 8 New locations for some Pokémon. IN-battle trainer messages. An almost working PokéGear. Exp. Share and exp. Gain identical to Gen 8 (Item is disabled by default, easy to enable) Mechanics, items and more almost updated to match Gen 8. Daily Wondertrade with in-game trainers. Move tutors on every PC. And even more... Scans and Gallery Credits Tiles: - Redzb1, Disaster, 874521, CnckK, Newtiteuf, Alucus, Dewitty, epicday, WesleyFG, 1158, Kyledove, Anonyboy, Scarex, Chaos Rush, Pokemon-Diamond, BoomxBig, Warpras, Lost Three, Zaux, Sprites: - Tsuka, Hollowroxas, 874521, SiPeaches, flamejow, skarow, The 64x64 DS sprite resource, PK Rockin!/, Jo7a, robeYi, FYTYn01 Engine: - Skeli, Ghoulslash, Soupercell, GoGoJ3tech, Shiny Quagsire, Jamb051, JPAN, FBI, Knizz, Jiangzhengweniz, Againsts, Andrea, Compumax, Kimonas, Zeturic, ipatix, Uncommoon, Samu, Shippo, Turambar, Spherical Ice, eMMe97, PC's community romhack, Other Resources: - !Nathan, Professor Village, Sierrafinity, Zaux, Karatekid552, Chaos Rush, Nisarg, Luna, Delta231, AO Project, Robey!, Kamina, VenZX, Foxz. * If I forgot to mention somebody, please let me know by PM or VM. Progress ~Progress updated up to 07/11/2019 road to Beta 3Maps: 0% Tiles: 0% Scripts: 0% Sprites and Overworlds: 85% Other graphics: 100% Known Bugs Fast forward speed is kinda laggy because of high quality music mixer using plenty of memory to run. (But we got high quality music) Pokemart Graphics are broken due to new RZE tileset system. Health bar graphics and exp. bar may not show correct information. However exp gain and health works as intended Dexnav may not work in mGBA and real hardware. it is pending to be confirmed. F.A.Q. 1. Whatever happened to your old hackroms? (Ragnarök) I have no more ideas and inspiration to continue that hackrom. It's not cancelled at all, but I have no plans to continue with it right now. 2. Is this hack a remake of GSC like ShinyGold, Liquid Crystal or GoldenSun? Heck no! This hack is a reboot, the same objective but different storyline and scripts. The story is a mashup of the concepts of Pokemon Gold, Crystal, Heart Gold and personal concepts. 3. Will this hackrom have more than one rival (Silver)? Yes, I can only confirm another rival now, your gender counterpart is another rival. 4. Why did you choose this style for the female player? It's based on this old artwork (I have no idea at this time who the artist is. The artwork was taken from a fake leak from HGSS around 2009) 5. Do you have plans to put Kanto and more regions? Kanto is confirmed. A Johto story without Kanto is incomplete, lol, and nope, I have no plans to put more regions, only Johto and Kanto Tools Used Complete Fire Red Upgrade and Dynamic Pokémon Expansion Advance Map 1.95 and 1.92 Gen3Tools OWM Hex Maniac APE FSF GBA Graphics Editor HxD XSE Tilemap Creator NSE Hackmew's THUMB assembler Downloads Center Awards From Somewhere else, Imao Special Thanks Skeli: How could I forget the creator of the amazing CFRU? In addition to the amazing job made for the engine, I truly appreciate also the feedback Skeli provided to me about the testing build (So sad it was an early testing build leaked with several bugs) Anonyboy: A really good guy who collaborated years ago with some tile animations. Compumax: He made the outstanding intro cutscene that you see when boot up the game. ThamTVMaster: The main beta tester and the person who reported most of the bugs not fixed yet at that time. James MC, Xan, Stonyterrace and BlackStarRegime: Main beta testers of Beta 2.5 Soupercell! For sharing part of the code used for the amazing Radical Red. All members of my Discord server for testing beta 2.5 Graphic design is my passion... Click on the picture to see the best hack ever created (? i like these graphics to be honest hopefully they soon die,good luck my friend if you need help ym me btw it looks awesome To all the people that still wonder, yes i still exist. This looks great ~GOLD! I hope it gets released soon! ~Eclipse Well you've finally posted it. good luck man!! Even thought in my opinion this will all look much better with 4th gen styled OW's. Pokemon... A new Dawn of ROM Hacking..... Oh, wow, it looks excellent! Too bad Ice Silver was cancelled, but otherwise, it looks good! I don't want to have a signature I could make a userbar and banner, if you want. Just need to know what kinda you want on them. me SOOO Happy At last a English was waiting for your hack in english damn thats too bad that ice silver got canceled I didnt even had the chance to try the demo on my phone since it froze :(Your hacks look amazing I love how you change everything in your hacks evenn the title screens and your tiles look cool but im sad that you keep cancel your hacks This hack you also stop in some progress like your two hacks - My new Project comming Soon As with your other hacks, nothing to complain about the graphics :) I love Johto, but wouldn't mind a slightly different story. Check out my hack "Pokemon Rocket Strike" How to patch a rom: 1.Download the patch. If it is in a .zip file then use a free tool named WinRAR to unzip the file. 2.Use Google to find the rom you need. 3.PATCH THAT THING AND LIVE LONG AND PROSPER! You look like a decent hacker and seem to know what you're doing, my only problem with you however is that you keep releasing all these project threads for hacks and you haven't actually finished any of them yet, I think you try focusing more on one hack at a time instead of trying to complete 3 because it seems like we'll be waiting a long time for them. It's rare to see some hacks become anything more than just a project and most end up breaking down and fizzling away never to be seen again and with your skills I don't want to see that happen. I know you said that you're only working on 2 now because of cancelling Ice Silver for the GBA but I think instead of just quitting because of the demo failing you should have stood with it got some help and released a full hack, I probably would have played it regardless of speaking no spanish just because it looked so good. I am getting a little annoyed at seeing so many progressing hacks and then most either are canceled or never see a finished product. It's getting boring playing the same hacks over and over it's time for some new blood. To be honest Pokemon BnW are now developed by my sister, is the reason of your not see an update, I'm also annoyed of not have a playable and decent beta, is because I'm working very hard only in this hack (and work on a secret rombase since september and recently work on kill 10 times per day the Nex's hack trying to insert a indoor battle BG (??) ----- Now I'm working on the maps, in this moment I'm mapping the route 30 Graphic design is my passion... Click on the picture to see the best hack ever created (? So. No more regions than Kanto and Johto also means "No Pokemons from Sinnoh, Unova or Kalos", right? _:_ ... Anyway, the hack looks pretty nice, the only things I don't really like too much are the TextBox and the HP Boxes at battle. Waiting to see more updates
