After vm went to archive, recording said it would only be available for 28 days !!! I need to recover that vm archival and again in saved voicemails. Help !!!

By Melissa King | Jupiterimages / Photos.com / Getty Images If you are using the Verizon cell phone to keep in touch with colleagues, family and friends, you probably know how fast your voice mailbox fills with messages. Once the mailbox is full, the Verizon server starts to delete old messages to make room for new ones. Storing voice mail messages solves this problem. Archived messages are saved in the phone directory "My Sounds" or an external memory card, if inserted. Switch on your phone by Verizon. If you plan to archive messages to an external memory card, such as a microSD card, insert it now. The procedure for the insertion of a memory card varies, depending on the phone model. Generally, the card slot is located on a side of the phone or the other. Dial "*" 86" and then press "Send" to access the Verizon voice mail inbox. Scroll through the messages until you find one you want to archive. Tap the right soft key, the "Options" label on the screen. Press "OK" or "Enter" to choose "Archive." Highlight the location where you want to save the voicemail message and press "OK" or "Enter." If you are using an external memory card, the choices will be "My Sounds" and "External Memory Card."
