I was tasked to create a simple media player app for a shop demo, and I'm using the built-in SeekBar for the volume control. All goes well, until I want to change the color of it. The design has it like the thumb of the SeekBar is white, and first half is green and rest half is grey. It took me almost a whole day to find a satisfying anwser, come on Android! But anyway, here is the simplest way that I can find. Define an volume_control.xml Below is the code for the custom_seekbar.xml file.
