You are guaranteed to find Hacksilver in chests, you will also be able to get more of this currency by simply smashing everything you come across. This includes crates, vases, boxes, and hanging buckets, you can also get Hacksilver by ramming barrels and bodies when you are in a boat. If Kratos has a high Luck Stat you will be able to find more Hacksaw. To increase his Luck Stat you need to find Yggdrasil's Dew of Luck. There are two in the game and they can be found in the Lake of Nine. One behind Svartalfheim Tower in King's Hollow and the other behind Buri's Storeroom. If you wish to visit the secret realms, defeat every Valkyrie, and view the secret ending, the gods will forgive you for using these God of War cheats. The Leviathan Axe can be upgraded to a maximum level of 6 by bringing frozen flames to Brok. You can get most of the frozen flames from bosses encountered during the main story. If you miss one, it will appear under the Lost Items section in the shop. The final frozen flame is obtained by trading in the Chilling Mist of Nifheim. It's locked inside a chest in the central chamber of the Nifheim realm. You'll need to collect 5,000 mist echoes to open the chest. Chaos flames can be used to upgrade Kratos' blades up to level 5. As with the frozen flames, all but one can be obtained during the main story. To fully upgrade the Blades of Chaos, defeat the Valkyrie in Muspelheim to earn the Raging Inferno of Muspelheim, then exchange it for the final chaos flame. After finishing the game, choose New Game + from the main menu screen to restart the story with all of your previously acquired moves, equipment, and currency. Additionally, you can craft new armor including the "Cod of War" suit from God of War II. After finishing the main story, return to Kratos' home and go to bed. You'll then see a special preview of the next God of War game. Unlocking Muspelheim requires you to find four Muspelheim Language Ciphers. There are more than four such ciphers hidden throughout the game, but these are the easiest to find: Muspelheim Language Cipher Locations Location Where to Find It The River Pass Enter the cave underneath the witch's house and look for a chest covered in viscera. The Mountain After meeting Mimir, descend the stairs and pass the mystic gateway to find a chest. Cliffs Of The Raven Land on the beach southeast of the temple. Look on the left side of the cliff for a small opening covered by wood. Smash through it with your ax, and give Atreus a boost so he can drop a chain for you to climb. Forgotten Caverns Go into the caverns northwest of the temple and climb to the upper level. Once you have four ciphers, you'll have access to Muspelheim from the Realm Travel Room. Unlocking Nifheim requires four Nifheim Language Ciphers. The easiest ones to get can be found in the following locations: Nifheim Language Cipher Locations Location Where to Find It The Mountain Go up the steps to the green garden area, then drop down to the snowy path. Look along the left side for another area you can drop down to where you'll find a realm tear and a chest. Lookout Tower Search the beach south of the temple near the Odin statue's foot. Ruins Of The Ancient After gaining access to Konungsgard, travel northwest of the temple to find a Soul-Eater and a chest on the beach. Council Of Valkyries Dock on the beach just right of the giant statues holding oars. Break the red crystals to clear a path and climb the cliff wall to find a chest. Nifheim will be selectable from the Realm Travel Room after you collect the ciphers. The Golden Talisman of Protection is a helpful accessory that can be obtained early in the story. After gaining access to the temple in the Lake of Nine, travel northeast to Stone Falls. You'll have to battle some revenants and solve a puzzle to reach the chest containing the Golden Talisman of Protection. To get the most powerful pommel for the Leviathan Axe, you must scale Muspelheim Tower in the southern region of the Lake Of Nine. It's only accessible via the Lookout Tower boat dock once the water level has dropped far enough for you to reach it. Once atop Muspelheim Tower, stand in the golden circle between the two braziers with burning fires. Face Tyr's Temple and use the Right Analog-stick to look in the following directions: Pause briefly while looking at each location. You'll hear a gong sound halfway through the process if you're doing it right. Straight ahead at Tyr's Temple. The left brazier on the Muspelheim Tower deck. Straight ahead at Tyr's Temple. The right brazier on the Muspelheim Tower deck. The left brazier on the Muspelheim Tower deck. Straight ahead at Tyr's Temple. Down at the floor of the Muspelheim Tower deck. The right brazier on the Muspelheim Tower deck. The left brazier on the Muspelheim Tower deck. Straight ahead at Tyr's Temple. This may take a few attempts, but once executed correctly, a realm tear will appear containing the Grip of Ages. Speak with Sindri in Nifheim to learn about Ivaldi's Workshop. Earn 500 mist echoes, then talk to Sindri again to get the workshop key. There are nine pieces of rusted armor in the workshop that are required to craft the Mist Armor. The Shattered Gauntlet of Ages is an obvious reference to the popular Avengers movie franchise. After completing the "Fafnir's Storeroom" favor for Sindri, take on the "Family Business" favor. The mission will send you to Northri Stronghold where you'll obtain the Exotic Shattered Gauntlet of Ages. To upgrade the gauntlet, you'll need five dragon tears. One is obtained during the main story, and three of them are earned by freeing dragons around Midgard. The fifth must be pilfered from the dead body of Baldur's dragon near the top of the Forgotten Caverns. Once powered up, the gauntlet can be augmented with special gems that grant Kratos new abilities. To get the fully upgraded Valkyrie Armor, you'll have to beat the Valkyries. The Valkyries are the strongest enemies in the game. Nonetheless, you can encounter some of them early in the story after completing the "The Magic Chisel" mission. Once you find one of them, the "Prove your Valour" side mission will begin, and all Valkyrie locations will be marked on your map. God of War Valkyrie Boss Locations Valkyrie Location Gunnr Thamur's Corpse, inside a Hidden Chamber of Odin Geirdriful The Foothills, inside a Hidden Chamber of Odin Eir The Mountain, inside a Hidden Chamber of Odin Kara Witch's Basement, inside a Hidden Chamber of Odin Rota Helheim, inside a Hidden Chamber of Odin Olrun Alfheim Light Elf Shore, inside a Hidden Chamber of Odin Gondul Muspelheim Trial VI Hildir Nifheim After beating the eight Valkyries, go to the Council of the Valkyries to unlock the battle with Sigrun. She is significantly stronger than the others, so go in prepared with your best equipment and runic attacks. If successful, you'll earn Sigrun's Helmet along with some other loot. Bring the helmet to Brok for an upgrade. All God of War 2018 codes work for the PS4 version of this awesome action-adventure Sony game. Take a look at the cheat codes below... Infinite XP Cheat Unlockable Bonus Nifheim Realm Here's how to get a lot of Experience Points (XP) with an easily repeatable glitch using Labors (this works up to at least God of War Patch 1.12). • Step 1: Find a Labor you are about to complete. • Step 2: Complete the Labor mid-combat for the XP bonus. • Step 3: Pause, unpause. • Step 4: Die to reset to last checkpoint. • Step 5: Repeat Steps 1-4 over and over! Tips: How much until you have enough to max? 200,000 to 250,000 XP. You can do it with the parrying, and get it up to 99 with the nightmare (flying eyeballs). Then when you meet the World Serpent and Brok gets his new shop. Go back out the door you came in on and run across the bridge. There 3 enemies with swords will run up to you. Parry the first enemy, follow the steps above: pause and check Labors, then stand there and die. This will result in you continuing to respawn in the shop (upgrade/save there and then continue the glitch). An even faster way is just beyond that. Go through the mission door, and freeze the poison traps until you get to the 3rd. A snake/ion-like monster will jump out (with 99 parries earned) just parry the monster once. Pause the game just to check that it logged, then run into the poison smoke to quickly kill yourself?. Note: If you're worried about a future patch update, simply go into your PS4 Settings and uncheck connection to Wi-Fi, then you'll get no surprise updates while playing? God of War. Unlockable Bonus Nifheim Realm: There are a total of 4 Nifheim Cipher Pieces in God of War that you need to find in order to unlock the Nifheim Realm, which contains the Ivaldi's Workshop which allows you to farm Mist Echos. (You will also complete the "The Realm of Fog" Favor upon finding all Nifheim Cipher Pieces.) You need to collect all the treasure from the workshops central chamber for the "Darkness and Fog" trophy. You also need to find all the cipher collectibles for the "Trilingual" trophy. Note: A lot of these require abilities that you don't unlock until very late in the story. So it's best to follow this guide after finishing the main story. • Nifheim Cipher Piece 1: The Mountain - [0:00] • Nifheim Cipher Piece 2: Lookout Tower - [1:08] • Nifheim Cipher Piece 3: Ruins of the Ancient - [1:49] • Nifheim Cipher Piece 4: Shores of the Nine - [2:39] [Work-In-Progress] Credit: John, JD & Harry Do you know of any other cheat codes in God of War 2018?
