Entertaining but focused, fun but very annoyed. Geometry Dash MOD APK, a game that is attractive enough to make anyone download it want to conquer. Introduce about Geometry Dash Geometry Dash is a one-button game developed by RobTop Games in 2013. The game features entertainment, fun about gameplay, visuals and music. But it is not, actually. Gameplay The rule is simple, players only need to control the square with a stupid face to overcome the obstacles that the game presents. By touching the screen, you will help the cube to bounce high, avoiding obstacles in front. At first glance, many people will think that Geometry Dash is an easy game to play. But actually they do not know how easy it has caused so many inhibitions for many players. The dizzy and difficult game speed right from the first levels makes Geometry Dash extremely difficult. Besides, obstacles are also arranged close together, making the game also more attractive. However, what makes the difficulty of Geometry Dash perhaps is that the game has absolutely no checkpoints. Unlike Mario, when you die, you will return to the starting line. Many players have reached 99% of the level but just because a thorn grows in the wrong place and falls in front of the heaven door. How terrible it is! Obstacles The obstacles in Geometry Dash are extremely diverse and they get more and more over time. At the same level, the scene changes happen quite often, taking players into different dimensions with obstacles that never appeared before. For example, stepping into the deep sea scenery, the character will sit in a diving ship swimming in the water. From there, new obstacles such as giant pillars or underground volcanoes appear extremely unexpected to fit the terrain and your ability. Not only that, the challenges in Geometry Dash are very special and "purposeful". Catching the rhythm with a part of the player's psychology, the publisher sometimes has surprise obstacles at the place you don't think of. This requires players with reflexes and the ability to master the space well to avoid harsh attacks from the game. Although it has caused many inhibitions, this is what makes people want to conquer this game. The more you play, the more you get caught up in the game, until you can overcome it. This is very similar to Flappy Birds, the game was released around the same time as Geometry Dash. If anyone ever tried this game would not forget the discomfort that the pipes and the stupid bird brought. Modes In addition to the normal mode of overtaking, Geometry Dash also has other modes that help the game not be boring. The training room is for those who have passed the game but still need to play it to improve their skills. In this mode, after passing each challenge, the player leaves a diamond with the same effect as the checkpoint. Players will be revived at that checkpoint every time they die, of course only when completing the level in a normal way. Another interesting feature in Geometry Dash is the ability to create maps, create challenges by yourself. Or even, you can create to share that map with other players. Graphics and sound Geometry Dash is not only good because of the attractive gameplay, but also the sound and color. The game has good, fun and engaging soundtracks. Besides, sound plays a secondary role in the gameplay of Geometry Dash. Why is that? The answer is that the music with bass beats that creating a beat for your playing style. And it is important that RobTop knows how to arrange the obstacles in accordance with the bass melody put in, helping players not to feel "out of beat", click at the wrong time and getting the bitter fruit. Game images are simple, not too picky. The color tones are not too bright to see obstacles. But this is no longer true in the later stages when the game speed is pushed up to add more obstacles continuously, requiring players to adapt to it if they want to go far. The MOD version of Geometry Dash MOD features The MOD version has unlocked all features of the game. You can download it via the links below this article.
