Aluminium cladding sheet specification for insulation

Aluminum sheets are widely used in fabricating aluminum insulation jacketing. Aluminum has light weight and good corrosion resistance. The disadvantage of aluminum is that is has poor durability when exposed to heat. The material can have stucco ,mill finish,Polysurlyn moisture retarder,Coated/painted,Kraft paper,Corrugated. Signi Aluminium is a familiar company of China dedicated to the manufacturing and selling of aluminum roll jacketing with thickness between 0.3- 1.6mm and width between 914mm-1219 mm.Out diameter: According to coil weight and finish most common coils length: 125mm 150mm 250mm 300mm 500mm 1000mm 2540mm. 90% of recycled aluminum issued for these aluminium insulation sheets coils. Signi Aluminium maintains a stock of the most common aluminum roll jacketing measures and alloys to ensure the fastest possible delivery .Among the applications of aluminium sheets insulation rolls we could include the following: aluminium sheets insulation coil roll for pipes, aluminium sheets insulation coil roll for ducts, aluminium sheet insulation coil roll for boilers and differents aluminium industrial facilities,Our aluminium sheets insulation coils are used, among others uses, forrefrigeration and heat insulation installers for coating boilers, pipes, ducts and other parts of the installation. Aluminum insulation jacket thickness and application More commonly used aluminum insulation jacketing thickness between 0.3mm to 0.8mm,different thickness of aluminum insulation jacketing and different applications,most aluminum insulation jacketing is used in pipes fittings and equipment, marine, chemical, industrial environments, or in industries processing food or beverages. for example, Corrugated aluminum roll jacketing is usually used in pipe system in industry or building. Aluminum has an excellent resistance to corrosion which reduces cost through long service, without maintenance or painting. The details are as follows : - 016" (0.4mm): Considered the standard for industrial use and recommended on pipelines up to 24" O.D., which includes the insulation. Primarily used to protect piping, vessels, and tanks that are less than 8 feet in diameter. - 020" (0.5mm): Applicable for insulation lines up to 36" O.D., including insulation. Primary use to protect towers, vessels, and tanks with a diameter greater than 8 feet. - 024" (0.6mm): Heavier gauge roll jacketing where extra strength and protection is required. - 032" (0.8mm): For areas where extra protection is required, or in custom fabrication of Box covers, tank heads, or heavy wear areas. Specification Alloy: 1100,1200,3003,3015 aluminum sheets insulation Temper: H14 H16 H24 H26 Thickness: 0.4mm--1.5mm Standard width: 914mm 1000mm 1200mm 1219mm Surface: stucco ,mill finish,Polysurlyn moisture retarder,Coated/painted,Kraft paper,Corrugated. Inner diameter: 305mm 405mm 505mm with paper core or without core Out diameter: According to coil weight and finish most common coils length: 125m 150m 250m 300m 500m 1000m2540m Surface lamination: stucco ,mill finish,Polysurlyn moisture retarder,Coated/painted,Kraft paper,Corrugated. Kraft paper thickness: about 0.1mm Polysurlyn thickness: about 0.076mm (3mil) Quality standard: ASTM B209 EN573-1 Quantity: have ready stock for most common thickness roll small quantity order are acceptable. Properties Strength Packaging and Delivery Aluminium cladding for pipe insulation is typically manufactured using alloys AA 3003, 3105, 1050, 1060, 1070, 5052, 5005 which are widely used for the purpose of insulation jacketing. Most common used alloy for insulation are 1060 and 3003 H14 H16. 3003 is better in anti-rust performance than 1060. Aluminum cladding for pipe insulation is available in Smooth, Stucco Embossed, with or without moisture barrier (craft paper and poly surlyn). Grade: 1006, 1100, 3003, 3105, 5005 Temper: O, H12, H14, H16, H24, etc. Common use: 3003 H14 H16, 1100 H14 H16, 5005 H14 Type: Coil roll Application: Industrial insulation jacketing, cover, insulation protective jacketing Thickness: 0.3-1.5mm Width: 914mm, 1000mm, 1219mm Length: 20, 25,30, 60, 90m per roll or as per clients Surface Treatment: Plain, Flat, mill finish, Embossed Moisture barrier: polysurlyn, craft paper Certificate: ISO9001, GB/T3880, ASTM B209 Packaging: packed in carton or coil in wooden pallet Delivery time: 25-45 days Minimum order quantity: 2 tons Alloy Thickness(inch) Thickness(mm) Width(mm) Length(m) Suggested Application 1100, 1060, 3003, 3105, 5005 H14, H16 0.012 0.3 914, 1000, 1219 20, 25,30, 60, 90, coil OD below 36"(914mm) insulated pipe lines. 0.016 0.4 914, 1000, 1219 20, 25,30, 60, 90, coil OD below 36"(914mm) insulated pipe lines. 0.020 0.5 914, 1000, 1219 20, 25,30, 60, 90, coil OD below 36"(914mm) insulated pipe lines. 0.024 0.6 914, 1000, 1219 20, 25,30, 60, 90, coil OD 36"-8" (914mm-2.43m) insulated pipe lines&equipment. 0.032 0.8 914, 1000, 1219 20, 25,30, 60, 90, coil special applications where extra thickness and protection is required, such as fabricated tank head covers and other special fabrications. 0.040 1.0 914, 1000, 1219 20, 25,30, 60, 90, coil special applications where heavy mechanical is required. 0.050 1.2 914, 1000, 1219 20, 25,30, 60, 90, coil flat ducts or precipitators. Also recommended for areas subject to high wind conditions. Remarks: Other sizes available upon request. Alloy Si Fe Cu Mn Zn Mg Ti Cr Other Elements Al Each Total 1060 0.25 0.35 0.05 0.03 0.05 0.03 0.03 - 0.03 99.6min 1100 Si+Fe=0.95 0.05-0.20 0.05 0.10 - - - 0.05 0.15 99.0min 3003 0.6 0.7 0.05-0.20 1.0-1.50 0.10 - - - 0.05 0.15 reminder 3105 0.6 0.7 0.30 0.30-0.80 0.40 0.20-0.80 0.10 0.20 0.05 0.15 reminder 5005 0.3 0.7 0.20 0.20 0.25 0.50-1.10 - - 0.05 0.15 reminder Smooth Aluminum Jacketing 1.Shed rain water the best 2. Show damage such as physical abuse. 3. Show the dirt due to its smoothness. 4. It is highly reflective of sunlight Stucco embossed Aluminum Jacketing 1, Increase its strength and ductility 2, Extend its lifetime 3, Better bribability, durability 4, Effectively reduce rowing 5, Not cause strong light reflecting 6, Have a good vision effect Aluminum Jacketing with Moisture barrier Haomei Aluminum Jacketing products can be supplied with a 40# kraft (1 1/2 mil polyethylene) or a 3 mil polysurlyn moisture retarder which is heat and pressure bonded to the interior surface. A moisture retarder helps prevent galvanic corrosion caused by contact of dissimilar metals in the presence of moisture or chemical corrosion caused by installing sheets over damp insulation materials. Benefit: Moisture barrier prevents corrosion and protect inner insulation materials Aluminum jacketing laminated with polysurlyn Poly surlyn : Dupont surlyn, 3 mil thickness(76um) Color: Bule Aluminum sheet thickness : 0.3-1.0mm Package: 20-30m/roll in one carton or big coil Advantage: water-proof, prevent oxidation 1.Customized packaging solutions for extended shelf life 2.Excellent barrier against moisture, oxygen & odour 3.Excellent mechanical properties even at low thickness 4.High burst strength and puncture resistant. Aluminum Jacketing is recommended for use in all of the following insulation system applications: • Standard outdoor use on all pipe, vertical tank insulation systems up to 8 ft outer diameter, and all horizontal tanks. • Indoor insulation system applications up to 8 ft outer diameter where increased damage resistance is desired. Strength of Haomei Al. Technologies:Top polishing technology guarantees good luster and smooth surface. Markets:Obtain market sharing all over the world. Equipment:Advanced cutting line to provide a wide range of specifications. Production capacity:200, 000 tons annually in total. Employees:Over 25 sale persons to provide good service for customers. Responsibility: Engaged in charity donation and provide eco-friendly products. Packaging and Delivery of Haomei Al. Aluminum products of Haomei Al. meet the export standard. Plastic film and brown paper can be covered at customers' need. What's more, wooden case or wooden pallet is adopted to protect products from damage during the delivery. There are two kinds of packaging, which is eye to wall or eye to sky. Customers can choose either of them for their convenience. Generally speaking, there are 2 tons in one package, and loading 18-22 tons in 1×20' container, and 20-24 tons in 1×40' container.
