Now click on the Notepad, located at the top left corner.Click on "Save As". In "File Name" delete the "txt" from the and write ".cmd" or ".bat" as "Activate Office 2010.cmd". In "Save as a Type" select "All files (*.*)". Click "Save" changes to an exe file. You'll see the configuration icon on it. Right-click on the exe file, i.e. "Activate Office 2010.cmd". Click on "Execute as Administrator". A pop-up window will ask you permission to say: "Do you want to allow this application to make changes to your device?" Click "Yes." The system symbol will run your activation code for Ms Office 2010. It'll take some time, so be patient and wait. If the activation is done successfully, you will see the message "Successful activation of the product". Open any MS Office 2010 app such as MS Word, MS PowerPoint, MS Excel, etc., to check whether or not it is enabled. If you like this post then don't forget to share it with other people. Share your comments in the comments section below. If computers are not your strong point, there is always help out there willing to guide you through every step. The help icon in the right corner can be very useful with common questions and navigation help; however, for additional questions and complex problems, phone numbers are the safest way to help you. Steps on how to activate Office 2010 through your computer Step 1: Start Activation for Office 2010 In the Microsoft Office app for 2010, open the file folder in the upper left corner. From there, select Help and then below-select activate product key. In the event that the product key is not available, there is no need to move forward, as this means that the product key has already been activated. Step 2: Follow the Activation Assistant Guide From here, the Activation Assistant will guide you through the following steps. Office Activation 2010 Via Phone Step 1: Choose Activate ViaOnce you get to the stage where the activation wizard is helping you navigate, you will be able to choose if you want to activate by phone. Step 2: Phone numbers by region are available The numbers by region will be given to you at this stage. Text lines are available for people who are deaf and hard of hearing, as well as access to these phone numbers from abroad.Step 3: Change your installation ID number to a confirmation number The installation ID number that is on your screen is a number that will help people on the phone with you identify your specific case. You may also be asked for other information, such as your product number, name or other identifying factors. Your product number is the one found on the box or outer packaging of the Office 2010 Program that you purchased. If you don't have a packing product key because you bought online, you must have received an email with the key inside. If you're still not lucky to find a product key, contact the vendor who bought your application form, and they should be able to find it for you. After providing this number and it has been verified, it will provide you with a confirmation identification number. Next, enter the number, as it will be used to activate your Office 2010. Step 4: Enter your confirmation number fr Finalization Later through the activation wizard, you will be able to provide your confirmation number to identify yourself and your case as verified. Next, select Enter. This will end the process for you with an Office 2010 application activated. Activating Office 2010 on a different computer With Office apps you can download Office on more than one computer, and therefore you should be able to activate 2010 on more than one computer. However, there may be cases where you will not be able to get through or you will receive an error message. With the option of activating the phone, there is IT that can help in these cases. If you have questions that you think might be easy to answer, there are places to find frequent questions, where other citizens like you have asked Microsoft to answer your questions. If I haven't activated Office 2010, will my current version still work? The Office 2010 version includes many features that are renewed and useful for artistic work, as well as research tools and other academic uses. Yes, Office will still work even if it is not updated or activated as a newer version. However, there may be some difficulties later on in the line, as eventually, Office will put previous versions in the mode, reduced functionality. This means that most of the documents will be available to be seen, but not edited. Why should I update and activate Microsoft Office 2010? Some of the features specifically addressed to sellers and advertising uses are SmartArt tools, the background removal tool, and several other useful templates. With the new pasting options developed, time and editing effort will constantly be eased. The photographic edition and manipulation of artworks and internet photos have been improved to allow cleaner finishes and more accurate results.
