The HP LaserJet P4014 Printer series boasts impressive productivity with print speeds of up to 45 ppm, letter size and A4 formats included. The series features a robust processor at 540 MHz and new toner technology for consistent results and optimal performance. With legendary HP reliability, users can enjoy worry-free printing that withstands office demands. Instant-on Technology allows for rapid start-up and completion of print jobs, reducing Time To Completion by nearly half. Using the printer is also hassle-free thanks to its user-friendly interface and features like Show-Me-How on the control panel for configuration and troubleshooting. The HP Easy Printer Care software enables monitoring and maintenance of up to 15 printers simultaneously. A single driver, the HP Universal Print Driver, communicates directly with each device on the network and customizes the user interface. Optional paper handling accessories increase workflow efficiency by allowing print jobs on various media types and sizes. Upgradable features include additional input trays, automatic duplexer, envelope feeder, output options like a mailbox or stapler/stacker, and an EIO hard disk for improved performance and storage capacity. The P4014n model comes with standard gigabit networking, while the P4014 can be upgraded with Jetdirect print servers. This printer series offers reliable, fast, and affordable black-and-white printing for workgroups. The manual specifications and product information for the HP LaserJet P4014dn are listed below. This high-quality printer is designed for professional use and offers fast printing speeds with sharp text and graphics. It features automatic double-sided printing, a large paper capacity, and support for various paper sizes, making it versatile for different printing needs. The HP LaserJet P4014dn has a robust construction and user-friendly interface, providing easy access to printing options and settings. It is network-ready, allowing multiple users to share and access the printer within an office environment. The device also comes with advanced security features, including secure printing and access control.

1. For configuring the stapler setting, refer to the printer driver's online Help for details or go to File > Print > Properties > Output tab > Staple dropdown list and select desired staple option.

2. In Windows, navigate to File > Print > Finishing > Output Destination > Select Stapler > Choose stapler style.

3. On a Mac, access File > Print > Finishing > Output Destination > Select Stapler > Choose stapler style.

4. At the control panel, click Menu > Configure Device > Stapler/Stacker > Staples > Choose staple style.

5. Note: Adjusting settings at the control panel defaults all print jobs to be stapled; printer driver settings override these settings. To use the HP LaserJet P4014dn with a Mac, ensure you have:

- A compatible operating system (Mac OS X V10.2.8 or later)
- The required PostScript Printer Description files and Printer Dialog Extensions
- Use the Apple PostScript printer driver
- Prioritize print settings changes in the Page Setup dialog box

To resolve poor print quality issues:

- Check if cartridges or toners are full
- Replace broken inkjet printers, calibrate laser printers, or contact sellers for non-genuine cartridges
- Refer to the manual's solution or seller's support
