How to get api in android studio. How to use google api in android studio. How to create api in android. How to use google maps api in android studio. How to use api in android.

Implementation 'com.google.android.gms:play-services-getty:18.0.0' Establish the compilation option of views in the Android block to enable the vision of the vision. But also, we recommend that you create an object of subscribers even though the API is not required. You must use nearby messages to establish the proximity between devices, but not for continuous communication. Then we pass the option when we call Publish (). Within the main activity (MainActivity.kt), above the onCreate () function, define the following variables by pasteing this fragment of code. \*/ private Val ttl in seconds = 120 //two minutes. The user can publish or discover (that is, subscribe to) messages using the switches added to the activity design. // Remember that we had established the expiration time in 120 seconds // use runonUiThread to force the call return // to execute in the thread ui runUiThread (binding.publishswitch.isChecked = false}))). Build () near. /\*\*\* Choose strategies to publish or subscribe for nearby messages. Its mainactivity should be seen as well as a com.example packet. widget.linearlayoutManager Import Androidx.recyCLERView.widget.recyCLERView Import Com.example.NarBymessageSexample.databinding.activityMaMainbinding Import Google.android.gms.ne Google.android.gms.arby.messages.publishopics Import Com.google.android.gms.arby.messages.strategy import Import com.google.android.gms.arby.messages.subscribeptions Import Java.nio.Charset.Charset Class MainActivity: Appcompatactivity () { /\*\*\* To access design variables Private: Activity activity /\*\*\* Establishes the time to live in seconds for publication or subscription. But in reality, they could make each user publish their user ID, or other adequate information for their use, close friends. // Remember that we had established the expiration time in 120 seconds // use runonUiThread to force the call return // to execute in the thread ui runUiThread (binding.subscceswitch.isChecked = false}))). Build () near.getMessageClient (this). Consequently, we will build our own subscribers and use their call -called Onexyred () Return to turn off the subscription UI switch. He learned to send messages that he learned to subscribe to discover messages that he learned to subscribe to discover messages (in this case, he simply showed them in a recyclerView) What follows? In the Activity.Main.xml file, replace the code with the next. We want the user to publish and not publish messages and discover (that is, subscribe to) messages. Java is a registered trademark of Oracle and/or its affiliates. SetupmessageDisplay ()} Now that the user interface is configured, we are ready to start publishing messages so that other nearby devices discover. // Remember that we had established the expiration time in 120 seconds.runonUiThread (binding.publishswitch.isChecked = false} RunonUiThread () (binding.publishswitch.isChecked = false}))). Build () near. (this). unPublish (mensaje) private diversiAñ de diversiAñ () (val options = suscriptoptions.builder () .setStrategy (PUB.SUB.Strategy). setCallback (objeto: suscriptcallback () (anular diversiAñ expired () { { RUNONUTHREAD (binding.subscceswitch.isChecked = false}))). Bld () near.getMessageScilent (this). Subscribe (Messagelister, options)} Private Fun Unsubscribe () (near.getMessageScilent (this). Unsubscribe (Messagelister) with (binding.nebysgreycylErview) (layoutManager = linearlayoutmanager (context) this.adapter = msgadapter string> = arraylistof () annular fun oncreateViewHolder (parent: viewgroup, viewType: int): messagevh (return messagevh (textvie) Cancel ltbindViewHolder diversion (Holder: Messagevh, Position: int) (Holder.bind (Getitem (position)))} Cancel the genetemcount diversion (: int = itemList.Size private diversion genetem (pos: int): String? As this is a demonstration, we are simply sending the device model. \* / VAR message from Lateinit Private Lateinit: Message / \*\*\* A [Messagelister] to process messages from nearby devices. Update its publish function () to the next. For this application, we want publication and discovery to stop after an arbitrary of 120 seconds. The subscriber will be listening to messages. The application has two switches that the user can alternate: the first switch is to discover or stop nearby messages; The second switch is to publish or unpublished messages. For more details, see the polyics of the Google Developers site. Add the com.google.android.arby.messages.api Key metadata element within the application in your manifest file. Cancel funny () (Super.Ondestroy () // although the API must close its processes when the client process dies, // you may want to stop subscribing (and publish if it is convenient) near.getMessageClient (this). UNPUBLISH (MESSAGE (MESSAGE). At this point our code must compile. // The message published is is The Build.Model of the device. Buildfeatures (Viewbinding True. ) Click Synchronize now or the Hammer Green Botine To maintain the simple coelab, each user will publish the compilation model of their tell © phone: Android.os.build.model. Val msgbody = string (message.content) msgadapter.additem (msgbody)) anular diversion onlost (message: message) // called when a message is no longer detectable nearby. Continuous communication can drain the device batteries at a speed of 2.5 to 3.5 times the normal battery consumption rate. Private Fun Publish () (Val Options = Publishopens.builder () .SetStrategy (pub.sub.straty). Setcallback (Object: Publishcallback () (Anular Fun Onexyred () {Super.onexpired () // scroll since the publication has expired expired expired . To stop subscribing, a subscriber must specify the listener. The close messages combines internet connectivity, bluetooth and other technologies to deliver this function. /\*\*\* to access the design variables Private lateinit: Manainbinding /\*\*\*\* activity establishes the time to live in seconds for publication or subscription. The file should seem similar to this.
