However, sometimes a successful song ends up attached to a disappointing release of large screen, thus eclipsing the film itself that is intended to complete. Here are five great examples of songs that have passed the charts, although the films are tied up to prove they are huge disappointments. For the record, we are going from the critical response and fans to these films, no matter how much they earned at the box office. 1. "Doesn't Really Matter" by Janet Jackson (2000) Source: Universal Images This pop song was Janet Jackson's ninth hit in number 1 in the United States, although his big screen counterpart, Nutty Professor 2: The Klumps, disappointed the public who loved his 1996 predecessor. The lyrical content of "Doesn't Really Matter" fits perfectly with the relationship between Eddie Murphy's Sherman Klump and the beautiful Denise Gaines, played by Jackson herself. However, his positivity goes in direct contrast to the meschina-spirit nature of the humor of the film, which largely forgets the heart that made the first film work. 2. "Give me to life" by Evanescence (2003) Source: Fox This rock song is definitely home with the rest of the tracks from the attempt to bring Marvel's Daredevil and made Evanescence a breakup success immediately afterrelease. While the song highlights the preparation of elektra (jennifer garner) to face the man without fear, it finally became one of the biggest hits of that year, gaining the endless radio and platinum status. Meanwhile, the film itself was largely considered as a narrative mess and led to fan outrage about the casting of ben affleck as a batman a decade later. 3. "New Divide" of linkin park (2009) source: paramount pictures also among fans of the franchise, transformers: revenge of the fallen is a weak point, poorly developing the foundation that was founded in the first film. However, the rock rollicking song of linkin park is one of the most acclaimed and successful songs of the band until today. Moreover, "New Divide" held better together with "What I've Done" — the band's single from the first film transformers — than the films themselves. the band would provide music for the third film, transformers: dark of the moon, in 2009, but the collaboration would never be halted at the same heights. 4. "Mille anni" by christina perri (2011) source: summit entertainment ok, twilight films are an incredibly easy goal, but also so, the twilight saga: breaking dawn — part 1 is rightly considered among the worst in the series. Perhaps one of his most effervescent crimes is his coopting of this beautiful dancead christina perri to serve as a theme of love for edward cullen (robert skatenson) and beautiful swan (kristen stewart.) "Mille anni" speakstimeless love and endless devotion, and its themes — which prompted the song to sell more than 3 million downloads — would have been much more resonant if the song was tied to a worthy movie. 5. "Occupied" by The Weeknd (2015) Source: Focus Features Fifty Shades of Grey — the large screen adaptation of the popular novel E.L. James — can not appeal to all movies, but this sensual slow jam on the soundtrack of the film certainly attracted a more rounded audience. In addition, the song introduced the general audience to the distinct vocal styles of The Weeknd, an artist who has since climbed to the top of the charts with single follow-ups such as "Can't Feel My Face" and "The Hills". Although we did not see the last of Christian Grey (Jamie Dornan) and Anastasia Steele (Dakota Johnson), at least their first film brought us this song.
