One just has to recall the different designs that evolved from 1940-2000 to understand the profound changes in design that occurred during the reign of Queen Victoria. This Victorian Parlor can be seen at the D. H. Lawrence Birthplace in Nottingham UK. It replicates the house where D. H. Lawrence was born in 1885.The parlor is typical of working class houses from that era. It reminds me a lot of my Granny's living room, including the dog ornaments on the mantelpiece, fireplace itself, the chair in the foreground, and the heavy [velvet?] table covering. I am remembering my Granny's house in the late 1940's, so it definitely was not the Victorian era. She and my Grandfather married around the turn of the century though, and they had a lot of children, so it is quite probable that they had the same furniture for all their married life. SANITARY WALLPAPER One of the problems with Victorianwallpaper was that it was difficult to keep clean. Wallpapers in kitchens or in heavy traffic areas were particularly vulnerable. From the 1850's on wallpaper manufacturers were seeking a way to make waterproof wallpaper. Various varnishes and other concoctions were used to coat certain wallpapers in order to make them washable.These became known as 'sanitary wallpapers. As well as being used in kitchens and bathrooms, sanitary wallpapers were also widely used in halls, passages and staircases. I can vouch for this because we had some horrid brown varnished wallpaper with a raised pattern in the hallway in my childhood home. Now I am not saying that I was around in the Victorian era, but our house well over 100. I was born in the 1940's, but that wallpaper had been on our hallway walls for many years before I came along. I can remember my Mum varnishing this wallpaper, it was only on the lower half of the wall, thank goodness,there was something much lighter on the upper walls. The varnished paper went all the way up the stairs. I knew it well because the stairs were my mother's version of of today's 'naughty chair'. There was nothing to do there except trace the raised diamond design on the wallpaper. Peel and Stick - Design #13605091High-quality, removable and renter-friendlyInstall: Easy, self-adhesive wallpaperMaterial: 100% paper with a woven linen textureGreat for: Bedrooms, Living Rooms, Entryways, Stair Risers, Small SpacesFree of: PVC and harmful chemicalsdimensionsWidth: 24 inchesLengths: 1 foot, 3, 6, 9, or 12 feetVertical repeat: 7 inches Download All SpecsCertificationsPrinted on Forest Stewardship Council® Certified wallpaperQualifies for LEED creditsClass A Fire RatedHP's GREENGUARD Gold certified water-based latex inksNote or country of originDigitally printed in the USAMilled in the USAReturn PolicyAll Spoonflower products are printed on demand, so we cannot accept returns or exchanges; this allows us to offer a wide range of designs from independent artists across 50+ products. Standard shipping typically arrives in 1-2 weeks.Learn more about Shipping Options.Peel and Stick Wallpaper InstallationWall Prep: Ensure walls are smooth (non-textured), clean and dust-free. Recently painted walls must dry for at least four weeks before installation. Avoid installing over washable, non-stick, scrubbable paints, on textured walls or high-moisture spaces. Application: Easy peel then stick. Suitable for DIY or professional install. No paste required. All Spoonflower panels print identically. Overlap: Intended overlap is 1/2" to ensure pattern alignment. Seam trimming is not required and a small overlap will be visible after installation. Removal: Removable - wet removal See Full InstructionsPeel and Stick Wallpaper CareCleaning: Gently wipe with a damp microfiber cloth using mild dish soap and warm water. Dry immediately with a soft towel.Avoid Harsh Cleaners: Do not use solvent, ammonia-based cleaners or abrasive agents, as they can damage the wallpaper's surface.
