Now you can find podcasts just about anything and all you have to do is subscribe and download. But what should film lovers be listening to on their commute or even at work? These are 10 awesome podcasts out there for every type of film lover. There is a podcast for you whether you're more into critically acclaimed films, or you love "so bad it's good" movies, or you love reading unmade scripts online. Every movie lover should try these ten podcasts at least once. 1. "How Did This Get Made?" Source: Earwolf If you love watching terrible movies or just hearing them get torn apart by people who love them, then this podcast is for you. The League's Paul Sheer and Jason Mantzoukas, and Grace and Frankie's June Diane-Raphael are usually joined by a guest to talk about a bad movie and its ridiculous plot holes, acting, lines, and more. Don't assume that this is fueled by haters. Many times the hosts actually come out enjoying and recommending the movies they review. At the end of each episode they also have a section called "second opinion" where they read five star reviews of each movie. Of course sometimes the hosts indeed find out how some of these movies get made through interviews with people who worked on the films themselves. It's truly an eye opener at the chaos that can ensue on set of a bad movie. 2. "The Blacklist" Source: The WolfPop If you're a fan of reading scripts especially, then this is right up your alley. This podcast takes scripts that haven't been made yet and get stars to sit down and do a table read of it. Host and former development executive, Franklin Leonard loves to refer to the episodes as "ear movies" and breaks up each script into four parts. The show switches the genres up so one month you might be deep into a drama while the next might be listening to a comedy. Many of the fans are able to vote which scripts they will do next. There also tends to be bonus episodes with an interview with the script writer. 3. "I Was There Too" Source: WolfPop Ever wondered what it would have been like to be on the set of The Exorcist? Or one of the passengers in Speed? Well this podcast has Matt Gourley interview actors who were in classic movies and television scenes who tell their stories seeing all the magic happen. This is a fun way to get an inside look into the industry from the extras or supporting roles point of view. 4. "Malin On Movies" Source: WolfPop You know Leonard Malin from his annual movie guides that rate films so you know what you're getting before hitting the theater. Now he has a podcast with Grace and Frankie's Baron Vaughn to talk about the film critic's favorite movies and some films you probably over looked. 5. "You Must Remember This" Source: American Public Media If you love looking into the history of Hollywood, then this podcast will let you nerd out. Longworth gets to the bottom of conflicting reports, mythology, and institutionalized spin to figure out what exactly was going on back then. 6. "The Flop House" Source: The Flop House Another option for people who love bad movies is this podcast. Hosts Elliott Kalan, Dan McCoy, and Stuart Wellington watch movies that were either commercial flops or considered flops by critics. More from Cheat Sheet: The Twilight Saga is just one of those film series that fans love to watch and revisit. Those who don't have a digital or DVD copy of the movies may be wondering where it is available to stream online. Luckily, there is one place you can find all five Twilight films streaming with a subscription you might already have. Robert Pattinson and Kristen Stewart from 'Twilight' | Franco S. Origlia/Getty Images What is 'Twilight' about? Based on author Stephanie Meyer's books, The Twilight Saga tells the story of Bella Swan (Kristen Stewart), a young teen who moves to Washington to live with her dad. In school she meets Edward Cullen (Robert Pattinson), a mysterious young man who she's instantly drawn to. Bella is also good friends with Jacob Black (Taylor Lautner), a Native American teen who lives with his tribe outside of town. After spending time with both Edward and Jacob, Bella soon discovers that they are not what they seem. RELATED: 'Midnight Sun': Could New Book From Stephanie Meyer Mean We're Getting a 'Twilight 6' Movie? The three teens get entangled in a complicated love triangle. And they also find themselves in the middle of a supernatural war. There are five films in the series - Twilight, New Moon, Breaking Dawn Part 1, Breaking Dawn Part 2, and Eclipse. The first movie was released in 2008, and the last one premiered in 2012. Who are the stars of the film series? All five Twilight movies star Kristen Stewart as Bella Swan, Robert Pattinson as Edward Cullen, and Taylor Lautner as Jacob Black. These were breakout roles for all three actors, and they've gone on to enjoy multiple successes since then. Pattinson is set to portray Batman in the upcoming DC film, and Stewart had a lead role in the 2019 blockbuster, Charlie's Angels. Aside from the three leads, Billy Burke and Peter Facinelli play Bella and Edward's fathers, Charlie Swan and Dr. Carlisle Cullen. Elizabeth Reaser portrays Edward's mom, Esme. And Nikki Reed and Ashley Greene step into the roles of his sisters, Rosalie and Alice. The Twilight Saga also features Hollywood A-listers Anna Kendrick, Dakota Fanning, and Rami Malek. RELATED: 'Twilight': Why Robert Pattinson's Audition Involved Anxiety and 'A Lot of Crying' for the Actor Here's where you can stream all of the 'Twilight' movies The Twilight Saga has been on a number of different streamers over the years. But like most big titles, it doesn't always stay on one platform for too long. In recent months, the series was only available to watch as a digital rental or purchase, or for those with a Hulu Live subscription. But the films recently found a new home where fans can watch without renting or purchasing. All five Twilight films (along with their extended cuts) are currently streaming on Amazon Prime Video. For those with an Amazon Prime membership, the movies can be streamed without any additional cost. It's unclear how long the films will remain on Amazon, so fans should go ahead and enjoy the films while they can. Though it's been over a decade since the first of the Twilight movies premiered, the films are still well-loved by many to this day. Thanks to streaming services, the films continue to find new audiences. Furthermore, when Stephenie Meyer (who authored the books that the movies are based on) finally released Midnight Sun, a reimagining of Twilight from Edward's perspective, interest in the movies piqued once more. But what is it the official order of the movies? Robert Pattinson and Kristen Stewart | Franco S. Origlia/Getty Images 'Twilight' Twilight is obviously the first movie in the series. Premiering back in November of 2008, fans got their first introduction to Edward Cullen and Bella Swan's love story. Though the film would go on to inspire four additional sequels and make household names out of Kristen Stewart, Robert Pattinson, and Taylor Lautner, nobody expected the film to be such a smash success. In fact, Catherine Hardwicke, who directed the first film, was given an extremely modest budget for the film, which gives it a distinctly indie feel. 'New Moon' Next up is New Moon, which released a year after Twilight in 2009. Following the success of the first film, the sequel got a significant budget increase as well as a larger press tour. The second film also was the start of the infamous love triangle which had fans declaring themselves Team Edward or Team Jacob and gave Lautner the opportunity to be a Hollywood heartthrob. RELATED: 'Twilight': Dakota Fanning Once Revealed Her Close Friends 'Forget I'm Even in the Movies' 'Eclipse' The third movie in The Twilight Saga franchise, Eclipse, continued to shatter expectations and beat out its predecessors in the box office when it released back in 2010. The film grossed nearly \$700 million worldwide at the box office and was packed with plenty of action and romance for all types of fans to appreciate. 'Breaking Dawn - Part 1' Taking a page out of Harry Potter's book, Summit chose to split Meyer's final book in The Twilight Saga up into two distinct movies. Though both films were shot at the same time, Breaking Dawn - Part 1 released a full year prior to its successor back in 2011. This decision allowed the studio to make even more money while also giving fans the opportunity to see more of the story translated onto the screen. RELATED: 'Twilight': Robert Pattinson Once Revealed Edward Almost Had Hair 'Extensions Down to My Hips' 'Breaking Dawn - Part 2' Last, but certainly not least, is Breaking Dawn - Part 2. The 2012 film marked the epic conclusion of Bella and Edward's love story and gave fans the chance to say goodbye to a franchise that had become wildly popular around the globe. Where are the 'Twilight' movies currently streaming? Though it's been years since the Twilight movies were in theaters, fans have managed to rewatch them thanks to popular streaming platforms. Currently, TwiHards (loyal fans of Twilight) are able to watch all five movies on Hulu. Of course, movies are added and removed from streaming platforms all the time, so there's no guarantee that the movies will stay on Hulu indefinitely. the twilight saga new moon tamil dubbed movie download in isaimini. the twilight saga eclipse full movie download in tamil dubbed. twilight saga tamil dubbed movie download in isaimini. the twilight saga breaking dawn tamil dubbed movie download in isaimini. twilight saga breaking dawn full movie in tamil dubbed download. the twilight saga new moon tamil dubbed movie download in tamilyogi
