List of Partners (vendors) 2 Times Tables Worksheet 1 of 5. D. Russell Print the Two Times Tables Fact Target Worksheet in PDF The target worksheets are made to look like a dartboard. The target number is two and it is in the middle of each of the target worksheets. The next ring shows what to multiply the target number, two by and the outer ring of the target is blank and it is where the answer (product) is to be written in. Learning the multiplication facts can be daunting for children and sometimes it helps to change up the process. These target worksheets change it up a bit to provide a different experience from the traditional horizontal or vertical worksheets. To ensure children today learn the multiplication facts and commit them to memory, it takes 10-15 minutes of practice three or four days per week, typically for the school year and sometimes longer. Worksheets like these need to be re-visited frequently throughout the year(s). Use an egg timer or stop watch and record how long it takes a child to complete a worksheet to gage progress. Playing beat the clock often stimulates some additional fun. 2 Times Tables Worksheet 2 of 5. D. Russell Print the Two Times Tables Fact Target Worksheet in PDF The two times tables are usually the quickest to quick to learn and to commit to memory. In fact, random facts should only be done after the child has learned the two, five, ten and squares (2 x 2, 3 x 3, 4 x 4, ...) timestables. A sequence should be followed when getting children to commit the facts to memory. For the two times tables, lots of oral skip counting helps to learn the facts. Skip counting refers to 2, 4, 6, 8, 10, 12 etc. However, when skip counting, don't always start at 2, use a variety of entry points to skip count. Take turns saying them orally, begin at various numbers. For instance, I'll say 4 and the child will say 8, I'll say 2 and the child way say 4, for every number I say, the child must provide the product by multiplying my number by two. You might also find the 100's chart useful for showing the patterns of counting by two. When using the hundred's chart, have the child shade in the multiples (2,4,6,8, 10.....) of 2. Christmas lessons and activities are great motivational techniques. Some of the best activities in an inclusional classroom include brainstorming activities. When you provide students with the opportunity to brainstorm, you are actually using differentiated instruction. Brainstorms work well for gifted learners, mainstream learners and disabled learners. Use the Printable Activity PDF or try some of the suggestions below. 1. How many different Christmas words can you think of? 2. How many different things can you put on a Christmas tree? 3. What realistic types of gifts do you want this year and why? 4. How many different things can you do on the Christmas holiday? 5. How many different foods can you think of for Christmas? 6. Why is Christmas special to you? 7. How many different Christmas songs can you think of? 8. How many words can you find using only the letters in the word Christmas? 9. List all your different memories of Christmas. 10. Think of all the different things that happen at your house at Christmas. (Types of decorations, visitors etc.) Brainstorms can be in writing or done in small or large groups in the classroom. All students have the chance to feel successful during brainstorm types of activities. free printable abacus worksheets pdf. free printable abacus worksheets level 1. free printable abacus worksheets level 2. free printable abacus worksheets level 3
