Ashina elite guide

If you make it to the top of the Ashina Castle you'll be in for a fight with one of the fastest and deadliest foes you've yet to encounter. The Ashina Elite, Jinsuke Saze is awaiting you in the Upper Tower Ashina Dojo. Jinsuke Saze is a fast swordsman and can kill you in a single slice. However, this guide will help you survive the fight with this Ashina Elite. How to Beat Junsuke Saze Ashina Elite Like other fights in Sekiro, this fight with Saze is going to require that you focus on blocking and dodging attacks. This fight in particular you should be mindful of getting hit because the damage can be enough to kill you if one blow lands. This Ashina Elite is also lightning quick and you'll take damage even when you block his lunging attack. We found that a good combination of items and weapons to use are the following: Equip the Firecracker Tool, and the Whirlwind Skill and you can have Junsuke Saze dead in just a few moments. When you head into the dojo run up to Saze and drop a Firecracker tool. He will be startled and then you can spam the whirlwind attack over and over until he gives up his first deathblow. The second phase of this fight is similar to the first. Look for the opportunity to drop a firecracker and then whirlwind spam him until he is dead. Although some tools, such as the Loaded Axe can do this, it's extremely risky and could leave you open to his attacks.Check Out the All Prosthetic Tools List Here Ashina Elite - Jinsuke Saze Boss Fight TipsCannot be Sneaked Up OnDon't bother trying to sneak up on Jinsuke because as soon as you walk into the room, he'll be alerted of your presence and the fight will begin.Defeat Jinsuke by Breaking his PostureIt's entirely possible for players to defeat Jinsuke Saze without even landing a hit on him. He's heavily reliant on his posture and breaking it will immediately open him for a Deathblow even if he's on full health.Break His Posture by ParryingThe best and easiest way to break Jinsuke's posture is by parrying his attacks. His sword swings attack can easily be parried once you get the rhythm of the 2 strikes.Being Aggressive will Get You KilledBeing too aggressive during the fight with Jinsuke can easily cost you your health or even your life. Stay on the defensive and focus more on blocking and parrying rather than landing hits. AttackDescriptionSword Side SwingTwo Sword Swings one after the other in a large arcHilt ThrustJinsuke will thrust the hilt of his sword to push players backPerilous AttackAn unblockable attack that sweeps in a low circular motionA glint will appear right before Jinsuke unleashes his 2 sword strike attack. Keep an eye out for it and once it appears, get ready to parry twice!Jump Up or Jump Back to Avoid Perilous AttackAs a Perilous Attack, Jinsuke's sweep attack is neither blockable nor parriable. You can instead jump up or jump back to avoid it.(C)2018 Activision Publishing, Inc. All Rights Reserved.Trademarks are the property of their respective owners. As soon as you approach the boss, run towards the right side and up the stairs. This will ensure that the boss will lose track of you. This will be indicated by the disappearance of the boss' life bar. Once that is done, go down the stairs and do the death blow from behind. This way you can drain the boss' first life bar. Now use the Magnet upgrade for the Loaded Umbrella Prosthetic tool and spam the block button and let the boss attack you. This will eventually drain the boss' posture and you can go ahead and kill the boss. Lone Shadow Masanaga The Spear-Bearer Ensure you have the Puppeteer move. Now before you head towards the boss, you will come across a bridge on which 3 enemies will be standing. Take out the big guy who is standing in the middle by doing a Puppeteer move on him. This will ensure that the other two shielded enemies are taken down by this big guy. Now run towards the boss and throw a shuriken towards him and run away from him. Now you have to lure him till the point he reaches the stairs and run away until he loses track of you (This will be indicated by the disappearance of the boss' life bar). Once this is done, head back and do death blow from behind. Now once again throw a shuriken and lure him towards the stairs. Ensure that the boss is at the beginning of the stairs (from the side you ascend). This will create problems with the boss's AI and he won't attack you. Ensure he doesn't goes up the stairs by continuously hitting him. Sooner or later he will be killed. Owl (Father) Although this is a ridiculously hard boss fight, there is a way to defeat it in a very easy manner. The idea is to learn the boss' basic patterns. There are two phases of this boss fight, so let's take a look at how you overcome this difficult challenge. Phase 1: Keep sufficient distance from the boss. The idea is to lure the boss towards you. You have to do this throughout phase 1. He will do a running straight attack. When he does that, walk (not run!) towards him and dodge so that you can get behind him. This is your chance to inflict one hit. Do that and run away from the boss. He will do a shuriken throw move followed by a sword attack. Simply dodge twice to avoid both of these attacks. Get behind the boss, get that one hit in, and run away from the boss. He will do a unblockable forward thrust indicated by a red sign. Do the Mikiri counter and one frontal attack. Do that and run away from the boss. He will throw firecrackers at you but since you are already away from the boss, you won't be taking any damage from it. Keep doing what we mentioned above and you should be done with phase 1 in a few minutes. Phase 2: Keep sufficient distance from the boss. The idea is to lure the boss towards you. You have to do this throughout phase 2. Most of the moves are same as Phase 1 but now he has an owl with him. He will use it to turn invisible. Simply run away and he will eventually appear. He will also do a owl fire attack. Simply get behind one of the pillars and you won't be affected by it. He will also do a double shuriken attack which can be easily dodged. Again, the entire idea is to stay away from the boss and lure him towards you! Keep this in mind!
