What are curly hair?: The studies revealed that curly hair depends on about 80 to 90 percent on genetics. A curly hair are actually a long hair that has variations both in the plot and for the hair follicle. Due to the asymmetrical nature of the hair follicles, the hair is curly and last up to six inches until the curls remain in proper form. Method 1 To obtain healthy and natural curly locks, you must first skip the shampoo. Instead, use an air conditioner to moisturize scalp and hair. You can use coconut oil or any other product that will keep your hair conditioned and fed. This will help you fight hair dryness. Application of the air conditioner after a shower can provide better results. Use a comb with wide teeth instead of a brush to shape your hair when wet. Gently apply your fingers into your hair to form curls. Finish with a hairdryer with the speaker and set the heat or the lower. Method 2 Make sure you reach the desired length of your hair if you want to get the correct curls. Don't cut, buzz, cone, layers or cut your hair until you reach the desired length. The next step would take a shower without using a shampoo. Exit the shower and use your finger delicately in your hair when your hair is still wet. This helps hair to earn weight due to moisture and therefore helps to form curls. The hair is rolled up due to the hair preserved. It is important to know what kind of curly hair you have, whether it's long and vicious spiral hair or long hair and wavy because this influences the change of wet hair until it dry. Stay away from Shampooing your hair frequently and using hair products too often. Instead, use hair spray, natural oils, leave conditioners, hair mousse, styling creams or a light-sealed hair gel. You will have to go through a stage when the curls will seem embarrassing, especially when the hair reached about 4 inches. It is not necessary to do anything except that taking a long time hairstyle. The embarrassing gradually disappears when the hair reached about 6 inches in length. Method 3 Take a hot oil massage for your hair so that scalp and hair roots get adequate nourishment to help in proper growth. Heat a mixture of olive oil, argan oil and coconut oil and apply it with your fingers on the scalp for about 10 minutes. This will help you condition your hair. Rinse the hair with apple cider vinegar to stimulate hair growth. Take three parts on a part of vinegar and water. Apply a deep conditioner, following the instructions for use and leave it for about 30 minutes. Prepare a mask with aloe vera and white egg and cover your hair for about 20 minutes. Wash your hair with cold water. A let the hair dry. Give your hair a onion rinsing. Boil half onion in water, let it cool and rinse your hair with the solution. This will promote hair growth, add shine. Natural curls will appear and become permanent when the hair reaches 6 inches in length. Using hair cream products A e a, ~ "always apply hair cream on dry hair and never to roots. This calms hair confusion. Oil products A e a, ~" Never use oil products on dry hair. The best process would be to apply a hot oil treatment immediately after a shower. If the serum is used, make sure to apply the serum to the ends and not to the roots. This will prevent hair from becoming too fat. a mousse only at the roots of the hair to prevent the hair becoming boring and sticky. When using a dry shampoo, apply to the hair roots and wash your hair once in a while. This will help your hair to be clean and free of natural oils that remain on the scalp. When using a hair lacquer, keep spraying about 12 inches from the head so that the spray covers the wider areas instead of focusing on a smaller area. Apply salt spray only after finishing hair styling. It is better to apply the spray half way offHair and then gradually coming down.
