PDFFiller is an online PDF form filler and editor that has been on the market since 2006. It allows you to not only fill out PDF documents, sign them and send them out but also to host them on your own website complete with the ability for people to do the same. Today, I'm going to share with you my PDFFiller Review.I first came across PDFFiller when they reached out to me to ask if I was interested in taking a look at their software. Being a long time DocuSign user, I was eager to check out an alternative and see if it met my needs. I'm glad I did. PDFFiller is significantly easier to use and felt far faster in my time using the software. For the purposes of this PDFFiller review, I've used a W8 form from the IRS (something I often have to fill out being Canadian and working with US companies).When you first log into PDFFiller, you'll be greeted with this screen:To add a document, simply click on the Add New Form button.Now upload your document to PDFFiller and it will instantly be available for you to fill out.Now that you've uploaded your PDF document, just click in the fields and fill out the information required. It's as easy as clicking and typing.Once you've filled out the form, it's time to move to the signature stage. Adding a signature is incredibly easy, you can type one out, draw it with your mouse, use a touch screen device (if you have one), capture a signature or upload one.In my case, I chose to draw one with my mouse, which I find is as close as I can get to real life. In this instance, I'm using a fake name so I'll just sign the document as Joe.That's all there is to the signing and filling out process. Pretty simply isn't it? Let's take a quick look at a few other slick features you get with PDFFiller. Adding a watermark to documents is always handy and doing so simply requires you clicking on the watermark tab on the right side of the screen and creating yours.This is incredibly handy for those of us who want to show people how a form should be completed but don't want it to be re-used somewhere else. Adding in a SAMPLE or VOID watermark is useful.Adding even more features, PDFFiller also allows you to spell check your document. Of course, it can only spell check the information you've typed out but it's a great feature to make sure you haven't made any mistakes on your form. To enable it, simply flick the switch as shown below.Once you've finished with your document, it's time to send it off. You have a slew of options such as printing it, saving it as Word or PDF, emailing, faxing, SMS and more.There you have it, as you can see, it's a very easy to use piece of software and incredibly handy for busy professionals who don't have printers with them on the road. Last but not least, they have one feature I can see people using on their websites that is incredibly handy, the ability to share a document that can be filled out and signed by visitors to your website. Check out the video below to see how it works:Simply sign up for an account with PDFFiller and you'll be well on your way to signing contracts, PDFs and more. They also have handy iOS and Android apps that are just as easy to use. The ABAS-3 combines all-new norms with updated item content to create the leading adaptive skills assessment. Retaining all features that made the second edition the preferred instrument for evaluating adaptive behavior, the ABAS-3 is even easier to administer and score. Comprehensive, convenient, and cost-effective, this behavior rating scale measures daily living skillswhat people actually do, or can do, without assistance from others. The ABAS-3 is particularly useful for evaluating those with developmental delays, autism spectrum disorder (ASD), intellectual disability, learning disabilities, neuropsychological disorders, and sensory or physical impairments. Multiple Raters, Different Perspectives The ABAS-3 includes five rating forms, each for a specific age range and rater: Parent/Primary Caregiver Form (birth-5 years) Teacher/Daycare Provider Form (ages 2-5 years) Parent Form (ages 5-17 years) Teacher Form (ages 5-17 years) Adult Form (ages 18-69 years) Parents, family members, teachers, daycare staff, supervisors, counselors, or others who are familiar with the daily activities of the individual being evaluated can complete these forms. The Adult Form can even be administered as a self-reporting tool. The items may be read aloud to raters who have low sight or poor reading skills. Although its possible to evaluate adaptive skills using only a single rater, gathering ratings from several people will provide a more complete assessment. Multiple ratings show how the individual performs in various settings. When different forms are used by different raters to evaluate an individuals adaptive skills, a comparative report can be generated to show areas that warrant further attention. Skills and Domains Consistent with AAIDD, DSM-5, IDEA, and RTI Guidelines The ABAS-3 covers three broad adaptive domains: Conceptual, Social, and Practical. Within these domains, the ABAS-3 assesses 11 adaptive skill areas (each form assesses 9 or 10 skill areas based on age range). Items focus on practical, everyday activities required to function, meet environmental demands, care for oneself, and interact with others effectively and independently. Raters use a four-point response scale to indicate whether the individual can perform each activity and, if so, how frequently the individual performs it when needed. The ABAS-3 is aligned with the AAIDD, DSM-5, and IDEA specifications and works well within an RTI context. The ABAS-3 generates norm-referenced scaled scores and test-age equivalents for the 11 skill areas. It also provides standard scores, confidence intervals, and percentile ranks for the three broad adaptive domains and for the summary scorethe General Adaptive Composite. Scores can also be categorized descriptively (Extremely Low, Low, Below Average, Average, Above Average, High). Online, Software, and Print The WPS Online Evaluation System offers convenient ABAS-3 administration, scoring, and intervention planning. Online testing allows clinicians to: Administer all forms locally or remotely Check the status of an administration at any time Score and report automatically Create customized intervention plans Easily monitor an individuals progress over time Quickly compare two raters scores The ABAS-3 can also be administered using paper-and-pencil forms that have been redesigned for ease of use. Scoring can be done quickly by hand or by desktop software. The Unlimited-Use Scoring Assistant and Intervention Planner Software generates a narrative interpretation of all scores, a strengths and needs analysis, a composite score discrepancy analysis, and more. Beyond Measure: Create Effective Intervention Plans Based on ABAS-3 Results Create and achieve therapeutic goals with the ABAS-3 Intervention Planner. Available in three formatsonline, software, and printit allows users to create a customized therapy plan based on areas of adaptive skill deficits identified by the ABAS-3. The Intervention Planner offers: Simple, straightforward intervention activities for each ABAS-3 item across all forms Developmentally appropriate strategies to help improve functioning at home, at school, at work, and in the community Versatile activities that can be used with an individual, with a small group, or in the classroom Suggestions for guiding teacher and family involvement in intervention programs Progress Monitoring Report (online and software) The Intervention Planner is included in all ABAS-3 Kits and may be purchased separately in print. Inform Diagnosis and Treatment Planning Measuring adaptive skills is important when a disorder or other condition affects an individuals daily functioning. Whether clinicians are trying to identify the best learning environment for a child or are ensuring that an older individual can live independently, the ABAS-3 provides the information necessary to make appropriate clinical decisions and design effective interventions. Its applications are almost endless. No matter the setting, the age of the individual, or the nature of their limitations, the ABAS-3 can help clinicians: Assess adaptive skills Diagnose and classify disabilities and disorders Identify strengths and weaknesses Document and monitor progress over time Develop treatment plans and training goals Determine eligibility for services and disability benefits Evaluate the capability to live or work independently This versatile instrument lets clinicians gather information from several raters in different settings to obtain a broad view of an individuals functionality. The ABAS-3 conforms to AAIDD, DSM-5, IDEA, and RTI specifications and can be used with confidence.
