Textbook of radiographic positioning and related anatomy pdf

Master radiographic positioning with this comprehensive, user-friendly text. Focusing on one projection per page, Bontrager's Textbook of Radiographic Positioning and Related Anatomy, 9th Edition includes all of the positioning and projection information you need to know in a clear, bulleted format. Positioning photos, radiographic images, and radiographic overlays, presented side-by-side with the explanation of each procedure, show you how to visualize anatomy and produce the most accurate images. Updated to reflect the latest ARRT competencies and ASRT curriculum guidelines, it features more than 200 of the most commonly requested projections to prepare you for clinical practice. Labeled radiographs (radiographic overlays) identify key radiographic anatomy and landmarks to help you recognize anatomy and determine if you have captured the correct diagnostic information on your images. Positioning chapters, organized with one projection per page, present a manageable amount of information in an easily accessible format. Unique page layout with positioning photos, radiographic images, and radiographic overlays presented side-by-side with the text explanation of each procedure to facilitate comprehension and retention. Pathologic Indications list and define the pathologies most likely to be encountered during procedures covered in each chapter to help you understand the whole patient and improve your ability to produce radiographs that make diagnosis easy for the physician. Pathology Demonstrated sections explain why a particular projection is needed, or what pathology might be demonstrated, to give you a larger frame of reference and a better understanding of the reasoning behind each projection. Radiographic Criteria on positioning pages provide standards for evaluating the quality of each radiograph, helping you develop a routine for evaluating radiographic quality. Pediatric Applications prepare students for clinical success — and prepare technologists to deal competently with the special needs of their pediatric patients. Geriatric Applications include general information on positioning techniques and patient handling for geriatric patients, fostering an understanding of the challenges these patients present to the technologist. Critique Radiographs demonstrate positioning errors and help you avoid similar errors in clinicals. Instructor resources include an accompanying Evolve website with PowerPoint slides, an image collection, and a test bank to help instructors prepare for class. Student resources include a workbook and handbook to help you better understand and retain complicated material. Kenneth L. Bontrager, MA, RT(R) John Lampignano, MEd, RT(R) (CT), Gateway Community College, Phoenix, AZ Views: 3514 Product code : 1452867379 Kenneth L. Bontrager, MA, RT(R), Gateway Community College, Phoenix, AZ John Lampignano, MEd, RT(R) (CT), Gateway Community College, Phoenix, AZ Focusing on one projection per page, Textbook of Radiographic Positioning and Related Anatomy, 7th Edition includes all of the positioning and projection information you need to know in a clear bulleted format. Positioning photos, radiographic images, and anatomical images, along with projection and positioning information, help you visualize anatomy and produce the most accurate images. With over 200 of the most commonly requested projections, this text includes all of the essential information for clinical practice. New to This Edition Over 150 new positioning photos and updated radiographic images provide the latest information for producing accurate images. Labeled radiographs identify key radiographic anatomy and landmarks to help you easily identify anatomy. More content on digital radiography describes cutting-edge developments in digital technology, including digital imaging quality factors, CR/DR exposure, and more. Key Features Radiographic Critique points out positioning errors to help you produce more accurate images. Pathologic Indications list and define common pathologies to help you produce radiographs that make diagnosis easier for the physician. Pediatric Applications and Geriatric Applications prepare you to deal with the needs of special populations, with information on exposure factors, positioning and shielding, and more. Alternative Modalities or Procedures explain how additional projections or imaging modalities can supplement general radiographic exams best demonstrate specific anatomy or pathology. Radiographic Criteria for each projection provide standards for evaluating the quality of each radiograph and help you produce the highest quality images. Pathology Demonstrated explains why a projection is needed or what pathology is demonstrated and provides you with a greater understanding of the reasoning behind each projection. Series: Textbook of Radiographic Positioning and Related Anatomy 864 pages Publisher: Mosby; 7 edition (February 27, 2009) Language: English Zise : 61.5 Mb Type : NVA Price : 8 \$ =====+===== Note : We will send ebook download link after confirmation of payment via paypal success Contact Email : pdfradiology.com@gmail.com Tags: 7th EditionTextbook of Radiographic Positioning and Related Anatomy by Richard M. Ross MD (Author), Kevin R. Moore MD (Author) © 1996-2015, Amazon.com, Inc. or its affiliates Page 2 With a very easy-to-follow organization this comprehensive text focuses on nearly 200 of the most commonly requested projections to ensure you master what's expected of an entry-level practitioner. And with Bontrager's user-friendly format featuring one projection per page — with bulleted information on the left side of the page and positioning photos radiographic images and anatomical drawings aligned on the right — you'll be able to quickly and easily visualize anatomy and master positioning. NEW TO THIS EDITION Updated photographs visually demonstrate the latest digital technology used in radiography with new radiographs, positioning, and equipment images. The latest ARRT competencies and ASRT curriculum guidelines are incorporated to prepare students for boards and clinical practice. Erect positions have been added throughout the text to reflect current practice. New Bernageau and Zanca projections have been included to keep students on top of these projections performed for shoulder pathology and trauma. Critique section at the end of chapters tests students' understanding of common positioning and technical errors found in radiographs. Answer keys are provided for instructors on the Evolve website. Information on pain management, blocks, and epidurals has been added to the Trauma, Mobile, and Surgical Radiography chapter. Expanded content on fluoroscopy has been included to keep students up to date on the latest information. What are the key features of "Bontrager's Textbook of Radiographic Positioning and Related Anatomy 10th edition" ? Labeled radiographs (radiographic overlays) identify key radiographic anatomy and landmarks? To help students recognize anatomy and determine if they have captured the correct diagnostic information on images. Positioning chapters organized with one projection per page present a manageable amount of information in an easily accessible format. Unique page layout with positioning photos, radiographic images, and radiographic overlays? Is presented side-by-side with the text explanation of each procedure to facilitate comprehension and retention. Clinical Indications? Features? List and define pathologies most likely to be encountered during procedures to help students understand the whole patient and improve their ability to produce radiographs that make diagnosis easy for the physician. Evaluation Criteria? Content on positioning pages describes the evaluation/critique process that should be completed for each radiographic image. Pediatric, Geriatric, and Bariatric Patient Considerations are provided to prepare technologists to accommodate unique patient needs. Emphasis on radiation safety practices provides recommendations important for clinical practice. Who are the authors of "Bontrager's Textbook of Radiographic Positioning and Related Anatomy 10th edition" ? John Lampignano, MEd, RT(R) (CT), Gateway Community College, Phoenix, AZ, USA Leslie E. Kendrick, MS, RT(R)(CT)(MR), Department Chair, Diagnostic Radiography Program Director, Department of Radiologic Sciences, Boise State University, Boise, Idaho, USA Sur commande Expédition sous 4 à 8 jours Livraison à 0.01€ à partir de 35€ d'achats en France Métropolitaine Satisfait ou remboursé sous 14 jours ouvrés Paiements sécurisés 3D Secure Service client Lundi au Vendredi : de 10h à 18h30 Samedi : de 10h à 12h30 et de 14h à 18h au 04 67 63 62 19 ou par email Bontrager's Textbook of Radiographic Positioning and Related Anatomy Textbooks | Buy Textbooks | Medicine Textbooks | Radiology & Anatomy Textbooks Summary Author bio Table of contents Digital rights
