Some gamer does not show interest to equip them because to equip them, they need much scrap to utilize it in the form of Trinkets. How to choose trinkets for the selected heroes?Sometimes trinkets do not improve the performance and strength of your selected hero but sometimes they do. The damage/gold scale is the same regardless of the slot, simply level slot 1 before slot 5 to get skill points first.I'd say put your main DPS right where you can level that hero, allowing you to go beyond the wall you're dealing with.If you put it too high, you can pass the wall, but you can not go very far. If you put it lower, then you can not get enough gold (without using chips) to level the hero.This is purely theoretical so feel free to do what you want.
