So, let's see some facts on the lily of Calla first and then we'll talk about her symbolism. What is the calla lily flower? It is important to know that the calla lily does not belong to the true family of lilies. It is similar to the lily, but it is another type of flower. In reality, in the 18th century a Swedish botanist gave the name of Calla Giglio to this species of flowers, but it was a mistake. Later it was shown that these flowers are not Lilies. In reality they are part of the Araceae family. Other plants belonging to this family are the philodendron and the hanging. Later a German botanist saw that this classification of the calla lily was not good, so he was the creator of the genus Zantedeschia aethiopica. However, this flower is still called today Lily Calla. Calla's lily also has other names, such as Arum lily or a trumpet. Calla's lily comes from Africa, but today it is located all over the world. These flowers love good weather and high temperatures, but they are also very resistant and durable, so they can endure very low temperatures and even frost. It is known that many flowers and other plants have healing properties and can help us treat many health problems. But with the calla lily it's not like that. This flower is poisonous, so it's not for medical purposes. In the past the underground stem of this flower was used as a treatment for wounds, but it is recommended to avoid this plant for any medical purpose. That's why people use these beautiful flowers just for their gardens or to make beautiful bouquets. They are used to make beautiful bouquets for brides, but also for arrangements in funerals.
