How to take songs from itunes to android

Although streaming services like Spotify and Tidal are taking the market, many music lovers prefer to download and save their music on their hard drive. Despite the defects and the fact that Apple is moving away from the Venerable Service, Apple iTunes is still one of the most popular ways to do it, but it's not easy to synchronize your iTunes library with an Android device. READ ALSO: [A](#), How to switch from iPhone to Android: Synchronize your contacts, photos and more! The least difficult way to transfer iTunes music files on your Android device is copying them manually. All you need is a USB cable to connect your phone to your computer and a little patience. How to copy iTunes Music on Android Manually create a new folder on the desktop. Copy the music files to be transferred to the new folder. Connect your Android device to your computer with a USB cable. You may need to adjust the phone settings to transfer files via USB (the option should appear in notifications). Switch to your Android device storage on your computer and copy-paste or drag and release the music folder. This method can be boring if you want to copy the individual traces rather than all albums. You may also miss the art album and keep track of metadata, depending on which Android music player uses. Synchronizes iTunes with Google Play Musicla Cloud has revolutionized the way people interact with their files and music is no different. Now, with Google Play Music, you can synchronize your entire iTunes library to the cloud and listen to it wherever you go. It is by far the easiest way to synchronize a large number of files from iTunes to Android. I abandoned Google Play music for my Plex Server: good and evil there are, however, a couple of important warnings. First of all, you will need an internet connection, at least for the initial configuration. Because Google Play Music is essentially a music streaming / cloud storage service, it will be practically using your data all the time unless you enclose all your albums. Pinning just simply download the music for storing your phone. There is also a limit of 50,000 songs, but this was probably not a problem unless you have a truly massive library. How to transfer iTunes Music via Google Play Music Download ... Google Play Music ManagerA € On your PC. Install the program and execute it. During the set-up, there will be an option to load songs on Google Play. Select iTunesA € and finish the initial set-up. Sit and let the program load all your songs for Google Play Music. Stream iTunes on Android with Apple Musicisf You don't want to abandon the Apple / iOS ecosystem entirely, then Apple Music is a good way to access iTunes on Android. There is no iTunes app for Android, but there is an Android app for Apple Music. As Google Play music, allows you to send your entire iTunes library from your Android phone or any other device simply by accessing your Apple account. Related: Apple Music vs Spotify vs Google Play Music Music also allows you to transmit 50 million songs and listen to careful playlists, but there is a capture. Unlike Spotify, there is no free version. To transmit iTunes music playback for Android, you will need to pay a monthly subscription fee of \$ 9.99. If this is not a dealbreaker, here's how to do it. How to scroll iTunes on Android with Apple Music Open iTunes on your PC and browse to preferences. On the General tab, activate the iCloud music library and click OK. The option is deactivated unless you have an Apple Music account. Download the Apple Music app on your Android device. Log in with your Apple ID. Your music by iTunes be available for flow. If you can't find your iTunes music, there are a number of ways to solve it: make sure you are registered in the same Apple ID on both devices. Update the app to the latest version on all devices. Update your iCloud library by going to file> Library> Update the iCloud music library. Synchronize iTunes and Android with a third-party apartment Programs allow you to directly transfer your iTunes music for Android. One of our favorites is the DoubleTwist app for Windows. This application allows you to transfer your playlists, music and videos from iTunes to your Android phone. When synchronizing files using DoubleTwist, note that the copied music files will be stored in the music folder inside the internal memory of the phone or tablet. How to synchronize iTunes on Android with DoubleTwist installs and start DoubleTwist on your computer. Connect your Android device to your computer. Make sure that the USB (or MTP) mass storage mode is enabled. Your device must be automatically recognized, which will activate a synchronization window. On the DoubleTwist music board, place a check mark next to music synchronizati

on and select all sections you want to send to the phone (playlist, albums, artists and genres). Tap the Sync Now button in the lower right corner to start transferring your music to your Android phone. This is for our guide to get your iTunes music on Android! Sometimes the simpler problems have the simplest solutions. Anyone who has ever tried to connect the phone to an automotive sound system has probably damaged the system at one point or another to automatically play the first song in their musical library. There are certainly worse problems in the world, but this was quite annoying for a person to find a creative solution. And the internet is to thank you. Samir Rezhami released a song on iTunes that are only 10 minutes of silence, explains Buzzfeed. It was called A € à, – "a song A a to a great, A € à, –" So it is guaranteed to jump to the head of the alphabetical queue in your musical library. If your car automatically starts playing your entire musical library, you will receive a few minutes of silence instead of a song you might not want to hear. If this sounds good, you can download the creation of rezhami from iTunes for 99 cents and enjoy the
