If there is no picture in this collection that you like, also look at other collections of backgrounds on our site. We have more than 5000 different themes, among which you will definitely find what you were looking for! Find your style! This collection presents the theme of HD Gaming Wallpapers 1080p. You can choose the image format you need and install it on absolutely any device, be it a smartphone, phone, tablet, computer or laptop. Also, the desktop background can be installed on any operation system: MacOX, Linux, Windows, Android, iOS and many others. We provide wallpapers in formats 4K - UFHD(UHD) 3840 × 2160 2160p, 2K 2048×1080 1080p, Full HD 1920x1080 1080p, HD 720p 1280×720 and many others.How to setup a wallpaperTap the Home button.Tap and hold on an empty area.Tap Wallpapers.Tap a category.Choose an image.Tap Set Wallpaper.To change a new wallpaper on iPhone, you can simply pick up any photo from your Camera Roll, then set it directly as the new iPhone background image. It is even easier. We will break down to the details as below.Tap to open Photos app on iPhone which is running the latest iOS. Browse through your Camera Roll folder on iPhone to find your favorite photo which you like to use as your new iPhone wallpaper. Tap to select and display it in the Photos app. You will find a share button on the bottom left corner.Tap on the share button, then tap on Next from the top right corner, you will bring up the share options like below.Toggle from right to left on the lower part of your iPhone screen to reveal the “Use as Wallpaper” option. Tap on it then you will be able to move and scale the selected photo and then set it as wallpaper for iPhone Lock screen, Home screen, or both.From a Finder window or your desktop, locate the image file that you want to use.Control-click (or right-click) the file, then choose Set Desktop Picture from the shortcut menu. If you're using multiple displays, this changes the wallpaper of your primary display only.If you don't see Set Desktop Picture in the shortcut menu, you should see a submenu named Services instead. Choose Set Desktop Picture from there.Windows 10Go to Start.Type “background” and then choose Background settings from the menu.In Background settings, you will see a Preview image. Under Background there is a drop-down list.Choose “Picture” and then select or Browse for a picture.Choose “Solid color” and then select a color.Choose “Slideshow” and Browse for a folder of pictures.Under Choose a fit, select an option, such as “Fill” or “Center”.Windows 7 Right-click a blank part of the desktop and choose Personalize. The Control Panel's Personalization pane appears. Click the Desktop Background option along the window's bottom left corner. Click any of the pictures, and Windows 7 quickly places it onto your desktop's background. Found a keeper? Click the Save Changes button to keep it on your desktop. If not, click the Picture Location menu to see more choices. Or, if you're still searching, move to the next step. Click the Browse button and click a file from inside your personal Pictures folder. Most people store their digital photos in their Pictures folder or library. Click Save Changes and exit the Desktop Background window when you're satisfied with your choices. Exit the program, and your chosen photo stays stuck to your desktop as the background. Last Updated on March 8, 2022 So you have a Macbook Pro with Retina display, and it is absolutely beautiful. Everything is so sharp! You could look at it all day! Well, maybe not the last one. You have things to get done, after all. But what if you have a wallpaper that doesn't have the right resolution? Then your display may not look as wonderful, as sharp, and as clear. This is certainly not the best way to show off what your laptop has to offer, aesthetically speaking. This is why these awesome wallpaper websites exist. Let's take a glance at each of them. Wallpaperfx This wallpaper website has a large collection of wallpapers and they are wonderful enough to separate them into categories. They specify dimension, and theme. The website has a simple interface and is easy and free to use. Interfacelift This website is a personal favorite of mine. When you enter the website there is a landing page with the most recent item. All of the images are gorgeous (and are gorgeously free). This website is specifically very useful in finding landscape photography. If you are a photographer, you get to look at beautiful imagery and learn how each work was created. ISO and shutter speed, for example, are tagged and/or described. Warning: one may spend lots of time looking at amazing pieces of work. They are almost as amazing as your laptop's display. WallpapersWide In addition to having categories separating the wallpapers by theme and dimension, WallpapersWide has an interesting interface option. If you hover over an image, you can click the thumbnail or the arrow that appears over the thumbnail. If you click the arrow, it allows you to preview and download the image. If you click anywhere else on the thumbnail, you have more options, like viewing related art and finding out how the image is tagged. It is sort of confusing, but very interesting. This is also a good place for gorgeous imagery. Dribbble Dribble is a website similar to DeviantArt in that search results are not guaranteed to provide exactly what you search for. This is because there is no designated place for wallpapers, so everything you find will be based on search results. You may see regular wallpapers or vectors, or anything tagged with the words you searched. When you find a wallpaper, it may or may not be free. Given these things, this website is very simple to use and may just be what you need for finding the right wallpaper. DeviantArt DeviantArt, the “largest online art community”, is the home of much more than just wallpapers. You will see all sorts of different categories, ranging from Flash designs to literature. When you search “Macbook Pro Retina Display”, you'll find many wallpapers often designed and packaged just for you! The only downside to this website is the fact that it is so huge. It may take a long time to find just the image you want. Still, the work is often mind-blowing and very much worth it. Related 20 Premium Ghost Themes for BloggersVladstudio Vladstudio has a very clean interface with beautiful wallpapers. The site also has apps and games, a shopping center, and more. There is one thing to note, however, that might prevent this site from being the preferred website to visit: In order to download a wallpaper in a certain resolution, you will need to create a premium account. If you are not willing to pay for your wallpapers, it is probably better to use another website. Digital Blasphemy The images on Digital Blasphemy consist of highly manipulated images that often have a surreal, fantastical look. Similar to Vladstudio, not all downloads are free and require a membership. Thankfully, this applies to wallpaper that offers multiscreen resolutions, so this does not apply to your awesome Macbook Pro. The interface is somewhat old-school as far as websites are concerned, but the images are fascinating and worth the download. High Resolution Wallpapers High Resolution is a very good wallpaper website. The images will work wonderfully with your super crisp and beautiful retina display. The site is free and the navigation is simple and easy to understand and use. HD Wallpapers Besides the slight change of aesthetics, HD Wallpapers is very much the same as High Resolution because it also has a simple interface, is easy to use, and is free. Related 50 Stunning Pixel Perfect PSD FreebiesMr. Wallpaper The only way to differentiate Mr. Wallpaper from High Resolution and HD Wallpapers are the images themselves. Mr. Wallpaper seems to have more of a variety in subject. The website is also free and easy to use. We can assure that any of these websites will help you find just the perfect wallpaper for your wonderfully beautiful and crisp retina display! Happy wallpapering! We present you our collection of desktop wallpaper theme: Marvel HD Wallpapers 1080p. You will definitely choose from a huge number of pictures that option that will suit you exactly! If there is no picture in this collection that you like, also look at other collections of backgrounds on our site. We have more than 5000 different themes, among which you will definitely find what you were looking for! Find your style! This collection presents the theme of Marvel HD Wallpapers 1080p. You can choose the image format you need and install it on absolutely any device, be it a smartphone, phone, tablet, computer or laptop. Also, the desktop background can be installed on any operation system: MacOX, Linux, Windows, Android, iOS and many others. We provide wallpapers in formats 4K - UFHD(UHD) 3840 × 2160 2160p, 2K 2048×1080 1080p, Full HD 1920x1080 1080p, HD 720p 1280×720 and many others.How to setup a wallpaperTap the Home button.Tap and hold on an empty area.Tap Wallpapers.Tap a category.Choose an image.Tap Set Wallpaper.To change a new wallpaper on iPhone, you can simply pick up any photo from your Camera Roll, then set it directly as the new iPhone background image.
