However, with the first product released on Google Play as Monster Truck Destruction, they showed that their studio has really potential. Almost 300,000 ratings with over 10 million downloads, it's hard to find a way to deny the point I just mentioned above. Numbers don't lie. After a long period of silence, Trucks Off Road was launched at the end of 2019. With previous successes, will this game make its predecessors safe? GameplayTrucks Off Road has quite typical gameplay compared to other Off-Road racing games. In general, the goal of the player is to sit in hisand try to finish first in the races. for anyone who has ever experienced monster truck destruction or another Off-Road version, this is familiar enough and easy to grasp. First of all, it's about the controls. is simple and includes only 4 buttons, with two main functions increasing or decreasing speed. the corresponding buttons are arranged at the bottom two corners of the screen, and this could not be more plausible for a game designed horizontally. Secondly, these are guidelines. If you don't know how it works, and what you should do to control it, or start the race, don't worry. developers have integrated a tutorial for beginners. so there is no more difficulty. at the time of conclusion to accept the terms and choice of the language, you receive a sum of \$20,000. There are no free cars available, and the first thing you have to do to start your journey to become a champion is to buy a car. There are many types to choose from with the most popular price bands of \$13,000 – \$14,000. then, everything is ready to start the race. Only one single currency is used in this game. This is the dollar. They are not difficult to find, but not much. the developer sometimes suggests that players look at ads to receive rewards, but it would be uncomfortable for noila challenge is increasingtrucks off road, of course, has differences, and the ground is one of them. if in monster truck destruction, you can compete with your opponent on dry roads, or inside a great gym, then in this part,of them take place in the slope full of mud. Perhaps some people will think: What do you say? The answer is that the challenge is at a higher level. Mud makes control difficult, and the engine life decreases leading to reduced performance. Moreover, moving in these areas will make you slower. And that will be why you're not the first to reach the finish line. Truck Off Road requires high skill. In addition to getting away from the rocks, or huge iron barrels, it is necessary to pay attention to the obstacles that make the car stagnant. However, the gameplay is designed at an appropriate level, and the difficulty will increase more slowly so that the player does not feel depressed. So, in addition to control, what else can we do better? Upgrade your vehicle Exactly, you need to upgrade your car to get better performance on track. They have the indicators Power (KW unit), Traction (%) and Wear (%). These parameters influence the speed of movement, traction and sensitivity of control. So how will control be affected? It is easy to give an example. If you have a series of tires with a higher level of friction, then it is more beneficial to travel on slippery soil, or in the mud. Or replacing a larger, stronger axis, then their traction will be significantly improved. Of course, there are many other parts that you can replace as Block, Intake, Bullbar, Carburetor, Soldier and more. They're all on the update. ModesThis game is designed ineasier way with only Career mode. But this does not mean that experience will be reduced by one mode. It is not boring when there are 10 tests to show your skills. Each of them has differences, from rules and conditions to win. The difficulty has increased after each test. The soil is more varied and more robust. The most professional opponents.
