

Fildena® Super Active

Fildena® Super Active is a generic Viagra. Each pill contains a standard dose of 100 mg of sildenafil. The highlight of this drug is that the active substance, encapsulated in soft capsules, is in the form of a gel. Are there any differences in the principle of action of capsules and tablets? Despite the fact that the goal for both these dosage forms is the same, the pharmacodynamics and, accordingly, the way of action on the body are slightly different. The tablet is designed for a slower and more smooth effect. Capsule, on the contrary, instantly dissolves and quickly gives effect. If you also want to speed up the effect of taking Sildenafil, we recommend that you get acquainted with the wonderful generic Viagra in capsules named **Fildena® Super Active**.

Active ingredient: [Sildenafil Citrate](#)

Sildenafil Citrate Soft Gel capsule

What is this medicine?

SILDENAFIL CITRATE Soft Gel capsules are equivalent to regular Sildenafil Citrate. This medicine is also used to treat erection problems in men. Soft Gel capsules act even faster than Sildenafil Soft tablets.

What should I tell my health care provider before I take this medicine?

They need to know if you have any of these conditions:

- eye or vision problems, including a rare inherited eye disease called retinitis pigmentosa
- heart disease, angina, high or low blood pressure, a history of heart attack, or other heart problems
